BOARD OF DIRECTORS' REPORT

Cramo's performance in 2016 was in line with the targets set for the year. Sales increased by 6.6% and was MEUR 712.3. In local currencies sales grew by 7.7%. EBITA-margin reached 15.0% and comparable EBITA-margin reached 15.6%.

Cramo is a service company specialising in equipment rental services and the rental of modular space. Its equipment rental services comprise construction machinery and equipment rentals and rental-related services, such as site and installation services. Modular space applications include schools, kindergartens, offices and accommodation facilities, and the rental period is typically 2–5 years. Cramo is a leading service provider in the field of equipment rental in the Nordic countries and Central and Eastern Europe. In modular space Cramo is a leading player in Northern Europe.

Cramo Group consists of the parent company Cramo Plc, which provides group-level services, and, as operating companies, its wholly-owned subsidiaries in each operating country. Modular space business is conducted under the name Cramo Adapteo. In addition, Cramo owns 50% of Fortrent, a joint venture with Ramirent that operates in Russia and Ukraine.

At the end of the year, Cramo operated in 15 countries and had 324 (328) depots.

STRATEGIC AND FINANCIAL TARGETS

The core of the Group's strategy is "Cramo People living the Cramo Story". Cramo Story is a wide programme through which Cramo will drive its sales in different countries, differentiate itself from the competition, provide specific customer value and strengthen its corporate culture. Cramo Group's Must-win battles are Deliver Cramo Story, Drive Cramo Performance Management and Win Central European Market. In addition, key strategic initiatives include modular space business growth, dynamic pricing and acquisitions and outsourcing.

Cramo's financial targets at the end of the financial year were: an EBITA margin of more than 15% of sales over a business cycle, a maximum gearing of 100%, faster growth of sales than

KEY FIGURES AND RATIOS (MEUR)	2016	2015	Change, %

Cash flow after investments	7.3	35.6	

The alternative Performance Measures used by Cramo are presented on page 57.

that of the market and a return on equity higher than 12% over a business cycle. In profit distribution, its target is to follow a stable profit distribution policy and to pay approximately 40% of earnings per share (EPS) for a period as dividends.

All these strategic and financial targets were achieved in the financial year. Comparable EBITA margin was 15.6% of sales, gearing was 74.5%, comparable return on equity was 14.9% and sales growth was 6.6%.

OPERATING ENVIRONMENT

Construction is estimated to have increased in 2016 in all Nordic countries as well as in Germany and Austria. According to Euroconstruct's estimate, growth was nearly 7% in Finland, Sweden and Norway. In Denmark, Germany and Austria, construction increased by approximately 1.6–2.5%. In Poland, the Czech Republic, Slovakia, the Baltic countries and Russia, construction decreased.

According to its June forecast, the European Rental Association (ERA) expected the use of equipment rental services to have increased in 2016 in all of Cramo's markets reported by ERA. According to Cramo's estimates, the demand for modular space has increased in the Nordic countries by nearly 6% per year during the past five years.

BUSINESS REVIEW

Cramo Group's business segments are Finland, Sweden, Norway, Denmark, Central Europe (Germany, Austria and Hungary) and Eastern Europe (Estonia,

Latvia, Lithuania, Poland, the Czech Republic, Slovakia and the Kaliningrad region in Russia). Cramo's share (50%) of Fortrent's profit is included in the EBITA of the Eastern Europe business segment. Cramo also reports on the financial information and order book value for modular space.

The sales and comparable profitability improved in all markets with the exception of Norway and Eastern Europe. The best profitability was achieved in Finland and Sweden.

In Finland, Cramo increased both its sales and its profitability. Sales increased strongly as a result of increase in residential construction and the steady growth in renovation. During the year Cramo strengthened its worksite logistics services in Finland by acquiring the business of logistics and telescopic handler company Kurottaja-ja Kuljetuspalvelu Parviainen Oy in April. In Sweden the market situation remained favourable and Cramo's sales and profitability improved. In Norway, sales decreased and the profitability was on par with the previous year. In Denmark sales increased, but profitability was negatively affected by EUR 3.7 million impairment. Comparable profitability increased also in Denmark. In Central Europe, sales increased and operations turned profitable. In Eastern Europe, sales and profitability decreased. The joint venture Fortrent's euro-denominated sales decreased by 4.2%; however, in local currencies sales grew by 4.6%. Fortrent's EBITA increased and was EUR 3.2. (2.2) million or 11.1% (7.2%)

of sales. The demand for equipment rental was strong in Moscow, while in the St. Petersburg area activity was relatively low.

The modular space business grew in local currencies in all of Cramo's main markets, and organic growth opportunities seem promising. Cramo also seeks growth through acquisitions.

SALES AND PROFIT

Cramo Group's consolidated sales for 2016 were EUR 712.3 (667.9) million, showing a year-on-year increase of 6.6%. In local currencies, sales grew by 7.7%. As for product areas, sales growth was 4.7% for equipment rental and 17.6% for modular space. Sales were EUR 595.3 (568.5) million for equipment rental and EUR 117.6 (100.0) million for modular space. Plenty of new modular space deliveries took place during the year, which increased the sales of assembly services in particular.

Profitability improved year-on-year. In 2016, EBITA was EUR 106.7 (84.8) million and EBITA margin 15.0% (12.7%) of sales. As for product areas, EBITA was EUR 86.2 (64.9) million, or 14.5% (11.4%) of sales, for equipment rental and EUR 30.8 (29.5) million, or 26.2% (29.5%) of sales, for modular space. Modular space EBITA margin was negatively affected by the higher proportion of assembly and disassembly services, high repair activity and measures taken to support further growth.

Comparable EBITA was 111.1 (86.6) or 15.6% (13.0%) of sales. Comparable EBITA was EUR 90.5 (65.7) million, or 15.2% (11.6%) of sales, for equipment rental and EUR 30.8 (29.5) million, or 26.2% (29.5%) of sales, for modular space. In 2016, items affecting comparability of EBITA were EUR 4.3 million. Items were related to negative impact of impairments EUR 4.8 million from Danish equipment rental operations and Latvian and Lithuanian operations and positive impact of EUR 0.5 million from reclassification of loans in Fortrent group. Fortrent books part of the exchange difference of the loans to the income statement instead of equity. In 2015, comparability was affected by EUR 0.8 million in costs relating to restructuring in Central Europe and EUR 1.2 million in costs relating to the change of President and CEO.

Cramo Group's EBIT improved also and was EUR 98.7 (76.7) million or 13.9% (11.5%) of sales. Comparable EBIT was EUR 106.2 (78.7) million.

The cost effect of the Group's credit losses and credit loss provisions amounted to EUR 2.3 (3.5) million. Expenses associated with share-based incentive schemes totalled EUR 2.5 (2.2) million.

Reported depreciation and impairment on tangible assets were EUR 112.0 (100.9) million and included EUR 6.1 (1.4) million impairments. Out of these impairments EUR 4.8 (0.0) million were items affecting

comparability related to impairments in Latvian and Lithuanian operations and Danish equipment rental operations.

Amortisations and impairments related to acquisitions amounted to EUR 8.0 (8.1) million and included EUR 3.2 (0.0) million items affecting comparability related to impairments in Latvian and Lithuanian operations and Danish equipment rental operations.

Impairments amounted to EUR 3.0 million in Latvian and Lithuanian operations and EUR 5.0 million in Danish equipment rental operations. Impairments were recorded based on annual impairment testing. Based on testing the net present value of expected future cash flows were lower than the capital employed, which resulted in impairment losses. The impairments have no impact on cash flow. After the impairment, the operations in question no longer includes goodwill or intangible assets resulting from acquisitions.

Net financial expenses for 2016 were EUR 11.8 (12.9) million. Profit before taxes was EUR 86.9 (63.8) million, and profit for the period was EUR 68.6 (49.7) million. Comparable profit before taxes was EUR 94.4 (65.8) million, and comparable profit for the period was EUR 75.6 (51.5) million. Items affecting comparability were EUR 7.5 million in 2016 of which negative impact of impairments EUR 8.0 million from Danish equipment rental operations and Latvian and Lithuanian operations and

MEUR	Sales			EBITA		
	2016	2015	Change %	2016	2015	Change %

positive impact of EUR 0.5 million from Fortrent group. Profit for 2015 included EUR 2.0 million in costs relating to restructuring in Central Europe and to the change of President and CEO. Tax impact of the impairments was EUR 0.4 million positive for 2016.

Earnings per share were EUR 1.54 (1.13). Comparable earnings per share were EUR 1.70 (1.17).

Return on investment (rolling 12 months) was 11.2% (9.0%) and return on equity (rolling 12 months) was 13.6% (10.5%). Comparable return on investment was 12.0% (9.2%) and comparable return on equity was 14.9% (10.9%).

INVESTMENTS AND CASH FLOW

Gross capital expenditure was EUR 207.3 (175.0) million. Of cross capital expenditure, EUR 4.4 (9.8) was attributable to acquisitions and business combinations. Other capital expenditure was mainly related to fleet procurement.

Cash flow from operating activities was EUR 172.2 (174.9) million. The following items affected negatively on cash flow in comparison to 2015. The group received tax refund of EUR 8.3 million in 2015. Change in net working capital had a positive effect by EUR 11.4 million on cash flow in 2015 compared to negative impact of EUR 1.5 million in 2016. Also cash flow of net financial items were lower by EUR 8.0 million compared to 2015 due to timing difference in realisation of foreign exchange differences arising from the hedged exposure and the hedging instruments. Investment cash flow was EUR -164.9 (-139.3) million. Cash flow after investments was EUR 7.3 (35.6) million.

FINANCIAL POSITION AND BALANCE SHEET

On 31 December 2016, Group's net interest-bearing liabilities totalled EUR 387.0 (368.4) million. At the end of the period, gearing was 74.5% (75.1%). Net debt per EBITDA stood at 1.77 (1.98). EBITDA used in calculation is rolling 12 months.

Of the Group's variable rate loans, EUR 130.0 (130.0) million were hedged by way of interest rate swaps on 31 December 2016. Hedge accounting is applied to all of these interest rate hedges. On 31 December 2016, Cramo Group had undrawn committed credit facilities (excluding leasing facilities) in the amount of EUR 206.1 (201.2) million, of which non-current facilities represented EUR 190.0 (185.0) million and current facilities EUR 16.1 (16.2) million.

Tangible assets amounted to EUR 750.5 (686.9) million of the balance sheet total at the end of the financial year. The balance sheet total on 31 December 2016 was EUR 1,155.8 (1,085.9) million. The equity ratio was 45.6% (45.7%). At the end of the financial year, goodwill totalled EUR 148.0 (151.1) million.

Rental liabilities associated with off-balance-sheet operational leasing agreements totalled EUR 20.7 (23.1) million on 31 December 2016. Off-balance-sheet liabilities for office and depot rents stood at EUR 98.7 (90.1) million. The Group's investment commitments amounted to EUR 53.9 (25.0) million.

On 14 November 2016, Cramo Plc announced a Tender Offer, in which the holders of the EUR 100 million 4.50% notes due February 2018, issued by Cramo, were invited to tender the Notes for cash to Nordea Bank Danske

A/S acting on behalf of Cramo. Tender instructions of EUR 83,730,000 in aggregate principal amount of Notes were received pursuant to the Offer. The purchase price of the Notes was 105.261%. In addition, accrued and unpaid interest was paid in respect of Notes. The Tender Offer results were announced on 24 November and the transaction settlement date was 29 November 2016.

On 23 November 2016, Cramo Plc announced that it will issue a senior unsecured bond of EUR 150 million. The bond matures on 28 February 2022, it carries a fixed annual interest at the rate of 2.375% and has an issue price of 99.948%. The proceeds from the bond offering will be used to refinance some of Cramo's existing indebtedness, including the partial redemption of the EUR 100 million bond maturing in 2018, and for general corporate purposes. The bond has been traded on Nasdaq Helsinki Ltd since 5 December 2016.

PERSONNEL

During the review period, the Group had an average of 2,550 (2,486; 2,528) employees. In addition, the Group employed an average of 178 (141; 149) people hired from a staffing service. At the end of the period, Group personnel numbered 2,562 (2,473; 2,473) as full time equivalent (FTE) employees.

Cramo Group's flexible operational model includes the use of not only permanent personnel, but also work force hired from a staffing service. The proportion of permanent personnel to work force hired from a staffing service as well as their numbers are constantly adjusted based on the market situation.

The total amount of salaries and fees paid was EUR 115.8 (108.3; 106.1) million.

MANAGEMENT TEAM

Operationally, Cramo has three market areas: Scandinavia (Sweden, Norway, Denmark), Eastern Europe (Finland, Estonia, Latvia, Lithuania, Poland) and Central Europe (Germany, Austria, Hungary, the Czech Republic, Slovakia).

Mr Leif Gustafsson was appointed as a president and CEO as of 1 January 2016. Cramo Plc's Group Management Team comprised the following people, in addition to CEO, at the end of the financial period: Göran Carlson, Senior Executive Vice President, Scandinavia, and Managing Director, Cramo Sweden; Tatu Hauhio, Executive Vice President, Eastern Europe, and Managing Director, Cramo Finland; Dirk Schlitzkus, Executive Vice President, Central Europe, and Managing Director (Germany, Austria, Hungary); Martin Holmgren, Senior Vice President, Fleet Management; Aku Rumpunen, CFO; Petri Moksén, Senior Vice President, Modular Space; Petra Schedin Stergel, Senior Vice President, Human Resources Development and Mattias Rådström, Senior Vice President, Communications, Marketing and Investor Relations.

Mr Aku Rumpunen was appointed CFO as of 21 December 2016. Mr Rumpunen worked as Senior Vice President, Group Business Control and member of the Group Management Team since 2013 and as an interim CFO as of August 2016, when CFO Martti Ala-Härkönen left Cramo. Petra Schedin Stergel and Mattias Rådström, both coming outside Cramo Group, assumed

their positions in September 2016. As of 1 January 2017, Mr Peter Bäckström will succeed Mr Göran Carlson. He was appointed in August. Per Lundquist, Senior Vice President, Operations left the company in August.

CURRENT INCENTIVE SCHEMES

In the One Cramo Share Plan incentive scheme for the Group's permanent employees, employees are offered an opportunity to save a maximum of 5% of their salary, and the accumulated savings are used for share purchases. The fifth savings period of the incentive scheme began on 1 October 2016 and will end on 30 September 2017. The first savings period ended on 30 September 2013 and a total amount of 12,565 related additional shares were conveyed in May 2016. In the One Cramo Share Plan, the participants get the opportunity to acquire one additional share for each two shares purchased.

The discretionary periods of the share-based incentive scheme for Cramo Plc's key employees are the calendar years starting from 2012. The rewards for the discretionary periods 2012-2014 were based on the earnings per share (EPS) key indicator. The rewards for 2013 were paid on 15 January 2016. A total of 43,562 shares were given in a directed share issue, in addition to which rewards were paid in cash in the amount of EUR 674,282. The rewards for 2014 were paid after the financial period, on 16 January 2017. A total of 21,211 shares were given in a directed share issue, in addition to

which rewards were paid in cash in the amount of EUR 428,482.

The share-based incentive scheme for the Cramo Group Management Team members and its key employees for 2015-2017 offers an opportunity to earn Cramo shares as a reward for achieving established performance targets. Each discretionary period will immediately be followed by a two-year vesting period before rewards are paid out. The target group of the scheme consists of approximately 65 Cramo key employees. Should the performance targets be attained in full for all three discretionary periods, the earned reward will correspond to a maximum total of 1,000,000 Cramo Plc shares, including the proportion to be paid in cash. The rewards for 2015 equal the approximate worth of 163,000 shares and will be paid in January 2018.

SUSTAINABILITY

Cramo is a signatory of the UN Global Compact principles for responsible business. Cramo's ethical guidelines aim to ensure that the customers, employees and the society can trust that Cramo works with integrity and high business ethics and continuously develop the workplaces as well as products and services in terms of health, safety and efficiency. The employees are trained under the framework of Cramo Care and the Code of Conduct. Based on a materiality analysis and an active stakeholder dialogue Cramo sets and follows up on group level target for the key areas of all stakeholder groups.

Cramo wants to be a role model for all rental, and safety, internally as well as on customer sites is a top priority. A strategic target is set on zero accidents related to Cramo equipment at construction sites. Cramo offers training to its customers in order to efficiently create awareness and competence to prevent accidents at construction sites.

Environmental responsibility is an important part of Cramo's business model. The Group is able to reduce the environmental load of construction by maintaining high utilisation rates for its equipment. Cramo's environmental responsibility involves ensuring that its rental and modular space solutions are of a high quality and carefully serviced and overhauled. When making equipment purchases, through its Supplier Code of Conduct Cramo requires its equipment suppliers to be signatories to UN Global Compact (or similar). Long equipment life cycles are maintained through careful maintenance. Material generated by equipment to be disposed of is recycled as comprehensively as possible.

Reducing energy consumption and cutting energy costs are key issues for Cramo. With Cramo's mobile surveillance system, Monitoring Construction, energy consumption can be reduced by approximately 20 percent. Transports and emissions are also reduced by efficient route optimisation and better driving patterns. Cramo participates in the international climate initiative, the Carbon Disclosure Project, where the emissions are reported on a yearly basis. Emissions are monitored using the international Greenhouse Gas Protocol for emission calculations.

ISO management standards 9001 and 14001 are implemented in Cramo Finland, Sweden, Denmark and Norway, and in Finland and Sweden also OHSAS 18001. Certification is ongoing, targeting all Cramo markets.

Since 2007, Cramo has partnered with the non-profit organisation SOS Children's Villages to support children in difficult situations. In addition to the annual financial support from Cramo Group there are various complementary, local activities in most Cramo countries.

Cramo's commitment to integrate sustainability into its entire operation is communicated in the Annual report by applying the Integrated Reporting framework. Cramo also publishes a separate sustainability report, which provides information on environmental management and corporate responsibility. The report follows the GRI 4 guidelines and will be published during the spring, and it will

also be available in electronic format on the Cramo website. The report is not verified by a third party.

SHARES AND SHARE CAPITAL

On 31 December 2016, Cramo Plc's share capital as registered in the Finnish Trade Register was EUR 24,834,753.09, and the number of shares was 44,690,554. At the end of the financial year, Cramo Plc holds 239,423 of these shares. After the review period, on 16 January 2017, the number of shares held by the company decreased to 218,212 due to the directed share issue based on Cramo Group's Performance Share Plan 2014.

As a result of the option programme 2011, the number of Cramo Plc shares increased during the financial year 2016. In the fourth quarter of 2015, a total of 69,260 shares were subscribed for. These shares were registered in the Finnish Trade Register on 18 January 2016, and trading in them began on 19 January 2016.

CHANGES IN SHAREHOLDINGS

During the financial year, Cramo Plc received the following notification about changes in shareholdings as defined in Section 5 of Chapter 9 of the Finnish Securities Markets Act: Massachusetts Mutual Life Insurance Company's, MassMutual Holding LLC's and MM Asset Management Holding LLC's total holding of share capital and voting rights in Cramo Plc decreased below five per cent on 3 October 2016. At that time, the companies' proportion of voting rights and share capital in Cramo Plc was 4.89% and they owned 2,185,577 shares.

ANNUAL GENERAL MEETING 2016 AND THE BOARD'S AUTHORISATIONS

Cramo Plc's Annual General Meeting of Shareholders held on 31 March 2016 adopted the consolidated financial statements and the parent company's financial statements for the financial year 2015 and discharged the members of the Board of Directors and the CEO from liability. The Annual General Meeting decided, as proposed by the Board of Directors, that a dividend of EUR 0.65 per share be paid from the distributable funds for the financial year 1 January–31 December 2015.

Ms Helene Biström, Mr Peter Nilsson, Mr Joakim Rubin, Mr Erkki Stenberg, Ms Caroline Sundewall and Mr Raimo Seppänen were re-elected as Board members and Mr Perttu Louhiluoto as new Board member.

The Annual General Meeting confirmed the remuneration payable to the chairman of the Board of Directors as EUR 70,000, to the deputy chairman as EUR 40,000

and to the other members of the Board as EUR 35,000 per year. It was decided that 50% of the annual remuneration will be paid in Cramo Plc shares purchased on the market on behalf of the Board members. In addition, all Board members are entitled to a compensation of EUR 1,000 per each attended Board committee meeting. The Chairman of the Audit Committee receives an additional compensation of EUR 5,000 per year. Reasonable travel expenses will be refunded.

KPMG Oy Ab, Authorised Public Accountants, was appointed as Cramo Plc's auditor, with Mr Toni Aaltonen, APA, as the responsible auditor.

The Annual General Meeting authorised the Board of Directors to decide on the repurchase of the company's own shares and/or their acceptance as pledge as follows: The number of own shares shall not exceed 4,400,000, and own shares may only be acquired using the company's unrestricted equity, at a price formed in public trading on the date of the repurchase or at a price otherwise formed in the market. Own shares can be acquired otherwise than in proportion to the shareholdings of the shareholders, and no more than 400,000 of these shares may be used in the company's incentive schemes. The Board of Directors was also authorized to decide on a share issue, including the right to decide on the transfer of the company's own shares and on the granting of option rights and other special rights entitling to shares, pursuant to Chapter 10 of the Finnish Limited Liability Companies Act. The shares issued will be new shares of the company, and a maximum of 4,400,000 shares may be issued. These shares cannot be used for incentive schemes.

The Annual General Meeting decided that the charter of the Shareholder's Nomination Committee remains unchanged. The Shareholders' Nomination Committee shall review the charter annually and propose possible changes to the next Annual General Meeting for adoption.

The Annual General Meeting authorised the Board of Directors to decide on donations to the total maximum amount of EUR 20,000 for charitable or corresponding purposes.

The authorisations are effective until the close of the next Annual General Meeting.

CORPORATE GOVERNANCE AND AUDITORS

At the end of the financial year, Cramo Plc's Board of Directors was composed of Ms Helene Biström, Mr Perttu Louhiluoto, Mr Peter Nilsson, Mr Joakim Rubin, Mr Erkki Stenberg, Ms Caroline

Sundewall and Mr Raimo Seppänen. Ms Helene Biström, Mr Leif Biström, Mr Eino Halonen, Mr Victor Hartwall, Mr Raimo Seppänen, Mr Erkki Stenberg and Ms Caroline Sundewall comprised the Board of Directors until the Annual General Meeting of 31 March 2015.

Mr Joakim Rubin (Chairman), Ms Caroline Sundewall and Mr Erkki Stenberg comprised the Audit Committee. Ms Helene Biström (Chairman), Mr Peter Nilsson and Mr Raimo Seppänen comprised the Remuneration Committee.

The members of the Shareholders' Nomination Committee established by the Annual General Meeting were nominated in November and they are Ms Helene Biström; Mr Mikael Moll, Partner, Zeres Capital; Mr Ari Autio, Member of the Board of Directors of Rakennusmestarien Säätiö; and Esko Torsti, Head of Non-listed Investments, Ilmarinen Mutual Pension Insurance Company. The chairman of the Nomination Committee is Mr Mikael Moll.

Mr Leif Gustafsson was appointed the President and CEO as of 1 January 2016.

On 31 December 2016, the Board members and the President and CEO held, either directly or through companies in which they exercise control, a total of 37,169 Cramo Plc shares. The company's auditors were KPMG Oy Ab, Authorised Public Accountants, with Mr Toni Aaltonen, APA, as the responsible auditor.

In 2016, Cramo Plc observed the Finnish Corporate Governance Code, which entered into force on 1st January 2016. Cramo manages inside information in accordance with the requirements of the Market Abuse Regulation (MAR), the Insider Guidelines of Nasdaq Helsinki Ltd. and Cramo's Insider Guidelines approved by the Board of Directors.

The Corporate Governance statement for 2016 issued by Cramo Plc's Board of Directors and the Remuneration Statement for 2016 are available on the Cramo Plc website.

ESSENTIAL RISKS AND UNCERTAINTIES

In addition to global economic developments, the main sources of uncertainty in Cramo's business are related to the economic cycles and financial development of each country, fluctuations in interest and exchange rates, availability of financing, credit loss risks, the success of the Group's acquisitions and information system projects, recruitment-related risks and tax risks.

Economic uncertainty may be reflected in Cramo's operations as decreased demand, fiercer competition, lower rental prices, higher financial

expenses or customers experiencing financial difficulties and increasing credit losses. In addition, economic uncertainty increases the impairment risks to the balance sheet values.

Of geopolitical risks, especially the Ukrainian crisis and difficulties in the Russian economy have increased economic uncertainty in Cramo's operations. Also, the political changes in Europe, such as "Brexit", numerous elections taking place in 2017 or sovereign debt challenges, may have an effect on general economic development and consequently on construction and the demand for rental services.

Cramo also has a risk appetite analysis based on the share value model for the strategy work. Cramo's Board of Directors confirm the company's risk management principles and evaluate the adequacy and appropriateness of risk management.

Cramo's risks can be categorised as strategic risks, operative and transactional risks, and economic, financial and tax risks.

STRATEGIC RISKS

The Group's operations are closely linked to general economic development and the construction and property markets. The construction industry is characterised by seasonal fluctuations, and the Group's sales and profit vary by quarter in a manner that is typical of equipment rental operations. The modular space business is less dependent on economic cycles than the equipment rental business. The Group also strives to minimise the impact of economic trends through continually optimising its rental fleet utilisation rate.

Expansion and business development are partly based on acquisitions. The risks in acquisitions are related to knowledge of local markets and regulations, customers, key personnel and suppliers, among other factors. The goal is to take these risks into consideration through careful preparation and by investing in the integration of acquisitions.

There are risks associated with the amount, allocation and timing of the investments and with other strategic business decisions. The goal is to control investment-related risks by applying a careful approval process for investments, optimising fleet use across the Group, financing some investments through operative leasing, and using external and internal indicators to forecast future market development, among other measures. These indicators that illustrate the future are monitored by country company on a monthly basis.

OPERATIVE AND TRANSACTIONAL RISKS

The Group's most significant operative risks include those associated with business operations and personnel, contract risks, occupational safety risks, IT-related risks, risks related to compliance with laws and regulations and risks related to the Group's administrative principles. In order to control the most significant strategic and operative risks, the Group and its subsidiaries have their own contingency plans. OHSAS 18001 certification has been granted to Cramo Finland and Cramo Sweden for their occupational health and safety management systems.

Cramo countries are responsible for the appropriate storage and reprocessing of chemicals and hazardous waste. Cramo's operations in Finland, Sweden, Denmark and Norway have been certified in accordance with the ISO 14001 environmental system and the ISO 9001 quality system.

The Group's transaction risks include risks related to equipment rental and uninterrupted operations, among other risks, which are managed by means of insurance.

ECONOMIC, FINANCING AND TAX RISKS

The objective of economic and financing risk management is to safeguard the company's high-quality external and internal financial reporting and the availability of financing and to minimise the adverse effects that changes in the operating environment and financial markets.

The Group's primary financing risks are cash flow's interest rate risk, currency rate risk, credit risk and liquidity risk. To manage the interest rate risk, the Group's loans and investments have been spread between fixed-rate and variable-rate instruments. Derivative contracts, such as interest rate swaps, are also used to manage the interest rate risk. The exchange rate risk mainly comprises net investments in foreign units and currency-denominated loans, with currency forwards as hedging instruments.

The Group's treasury policy specifies the responsibilities and procedures of the treasury function as well as the targets and principles of hedging. The Group's country-specific financing is handled in a centralised manner, primarily through internal Group loans.

The tax environment in Europe is changing towards new or increased taxes and new interpretations of existing tax laws. The decreasing predictability and visibility around taxes may lead to unexpected challenges also for Cramo.

OUTLOOK FOR 2017

In Cramo countries, the market outlook for 2017 is mainly positive. The construction market analysts Euroconstruct and Forecon estimate that construction will increase in all of Cramo's operating countries with the exception of the Czech Republic, Lithuania and Russia. Euroconstruction estimate that construction will increase 1-3 per cent in Nordic countries, Germany and Austria. In Eastern Europe, the growth expectations vary from 1-6 %. ERA forecasts that the equipment rental market will grow in all of Cramo's operating countries that are within the scope of ERA's forecast.

The demand for equipment rental services usually follows the development of construction with a delay. In addition to construction volume, the demand is affected by industrial investments and the increase in the rental penetration rate. Tightening legislation and the requirement to improve the efficiency and quality of construction increase the need for different types of rental-related services.

The demand for modular space is boosted by the increase in the need for and popularity of modifiable and easily implementable space solutions. Demand is increased by migration flows within countries and changes in demographics. Cramo believes that the long-term demand for both equipment rental and modular space is also supported by megatrends, such as urbanisation, the sharing economy and the increasing emphasis on sustainability.

CHANGE IN GUIDING PRINCIPLES

As of 2017, and relating to Cramo's new strategy, the company has changed its guidance policy and will discontinue to provide numerical guidance on sales and EBITA profitability on group level. More information will be provided on Capital Markets Day on 16th February 2017.

THE BOARD OF DIRECTORS' PROPOSAL FOR PROFIT DISTRIBUTION

Cramo Plc's goal is to follow a stable profit distribution policy and to pay approximately 40% of earnings per share (EPS) for a period as a dividend.

On 31 December 2016, Cramo Plc's total distributable funds were EUR 183,616,896, including EUR 41,398,811 of retained earnings. The Board of Directors proposes to the Annual General Meeting that a dividend of EUR 0.75 (0.65) be paid for the financial year 2016.

The Annual General Meeting is planned for Thursday, 30 March 2017.

SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

The Shareholders' Nomination Committee of Cramo Plc proposed 2 February 2017 to the next Annual General Meeting of Shareholders, which is planned to be held on 30 March 2017, that the number of members of the Board of Directors be confirmed as seven (7) ordinary members. The Nomination Committee proposed that, in accordance with their consents, the following current members of the Board be re-elected: Perttu Louhiluoto, Peter Nilsson, Joakim Rubin, Raimo Seppänen, Erkki Stenberg and Caroline Sundewall, and that Veli-Matti Reinikkala be elected as new Board member, all to serve for a term ending at the end of the Annual General Meeting 2018.

The current Chairman of the Board of Directors Helene Biström has announced that she will not be available for re-election. While preparing the proposal for the composition of the Board of Directors, the Nomination Committee has specifically sought to identify a new Chairman of the Board of Directors.

Based on the Nomination Committee's survey, discussions with the Chairman

of the Board of Directors and the CEO of the Group, reports of an independent recruiting consultancy as well as the Board self-evaluation and evaluation process conducted by an independent consultant, the Nomination Committee has decided to propose Veli-Matti Reinikkala to be elected as a member of the Board of Directors. Further, the Nomination Committee recommends that the Board of Directors elect Veli-Matti Reinikkala as the Chairman of the Board of Directors.

Veli-Matti Reinikkala (born 1957) has held several senior management positions in ABB, including President of Region Europe in 2015 and member of the Group Executive Committee 2006-2015, Head of Process Automation Division 2006-2014, Business Area Manager for ABB Process Automation in 2005 and Automation Technologies Division Manager in China 2003-2004. Reinikkala is currently a member of the board of directors at UPM-Kymmene Corporation (since 2007) and Fortum Corporation (since 2016). He holds an Executive Master of Business Administration from Helsinki School of Economics.

THE ALTERNATIVE PERFORMANCE MEASURES

The alternative Performance Measures used by Cramo are defined below:

EBITA

= Operating profit (EBIT) + amortisation and impairment on intangible assets (purchase price allocations) arising from acquisitions

EBITDA

= EBITA + depreciation

Net debt / EBITDA

= $\frac{\text{Period end net debt}}{\text{Rolling 12 month EBITDA}}$

Comparable EBITA

= EBITA - items affecting comparability

Comparable EPS

= $\frac{\text{Profit for the period} - \text{items affecting comparability (rolling 12 month)}}{\text{Adjusted average number of shares during the period}}$

Comparable return on equity, %

= $\frac{\text{Profit for the period} - \text{items affecting comparability (rolling 12 month)}}{\text{Total equity (average)}} \times 100$

Comparable return on investment, %

= $\frac{\text{Profit before taxes} + \text{interest and other financial expenses} - \text{items affecting comparability (rolling 12 month)}}{\text{Balance sheet total} - \text{non-interest-bearing liabilities (average)}}$

¹ Starting from 2016, the reporting line of unpaid investments in the cash flow statement has been changed. The comparative period 1-12/2015 has been changed accordingly. As a result, the operating cash flow for 1-12/2015 decreased by 8.0 million and cash flow from investing activities improved by EUR 8.0 million.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. ACCOUNTING PRINCIPLES RELATING TO THE CONSOLIDATED FINANCIAL STATEMENTS

COMPANY PROFILE

Cramo is a service company specialising in equipment rental services, as well as the rental of modular space. Cramo operates in fifteen countries in the Nordic and in Central and Eastern Europe with 324 depots and 2,550 employees.

The Group's parent company, Cramo Plc, is a Finnish public limited company, established in accordance with Finnish legislation, and its Business ID is 0196435-4. The address of Cramo Plc's registered office is Kalliosolantie 2, 01740 Vantaa. Cramo Plc has its listing on the main list of Nasdaq Helsinki Ltd.

A copy of the consolidated financial statements is available on the internet at www.cramogroup.com or can be obtained at the parent company's head office, address Kalliosolantie 2, 01740 Vantaa.

On 6 February 2017, the Board of Directors approved these consolidated financial statements for issue. According to the Finnish Companies Act, the shareholders have the opportunity to approve or reject the financial statements at the Annual General Meeting held after their publication. Furthermore, the Annual General Meeting can decide on modifications to be made to the financial statements.

BASIS OF PREPARATION

The consolidated financial statements of Cramo have been prepared in accordance with International Financial Reporting Standards (IFRS) approved for adoption by the European Union, including International Accounting Standards (IAS) and the SIC and IFRIC interpretations valid on 31 December 2016. In the Finnish Accounting Act and ordinances based on the provisions of the Act, IFRS refer to the standards and their interpretations adopted in accordance with the procedures laid down in regulation (EC) No.1606/2002 of the European Parliament and of the Council. The notes of the consolidated financial statements also conform to the demands of the Finnish accounting and corporate legislation which supplement the IFRS.

The consolidated financial statements have been prepared under the historical cost convention, except for derivative financial instruments, share-based payments and defined benefit pension plans. The

information in the financial statements is presented in thousands of euros.

The preparation of financial statements in accordance with IFRS requires the performance of certain assessments by the Group management and data about the judgements they have made. The data about such judgements the management have used in applying the Group's accounting principles for the preparation of financial statements and which affect the consolidated financial statements most significantly is presented in Accounting Principles under the section "Accounting principles requiring the management's judgement and the principal uncertainties of estimates."

CONSOLIDATION PRINCIPLES

SUBSIDIARIES

The consolidated financial statements include the parent company, Cramo Plc, and those subsidiaries over which the Group has control. The Group has control of an entity when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. All the facts and circumstances shall be considered when assessing the control. The investor shall reassess whether it controls an investee if facts and circumstances indicate that there are changes of the elements of control. Power means that the investor has existing rights that give it the current ability to direct the relevant activities, i.e. the activities that significantly affect the investee's return. Acquired subsidiaries are consolidated from the date on which control is transferred to the Group, and are no longer consolidated from the date that control ceases. The Group has 100 percent control over all its subsidiaries. The subsidiaries are listed in note 31.

Business combinations are accounted for using the acquisition method. The consideration transferred in a business combination is the fair value of the assets transferred, the liabilities incurred and the equity instruments issued at the acquisition date. Any contingent consideration is recognised at fair value at the acquisition date and classified as a liability or equity. Contingent considerations classified as a liability are measured at fair value on each reporting date with changes recognised in the income statement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values

at the acquisition date, without deducting non-controlling interest. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets of the subsidiary acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the consolidated statement of comprehensive income.

All of the Group's intercompany transactions, receivables, liabilities and unrealised gains, as well as its internal profit distribution are eliminated; unrealised losses are also eliminated unless the costs cannot be recovered.

JOINT VENTURES

The consolidated financial statements include those entities which the Group has a joint control. Investments in joint ventures are accounted for in the consolidated financial statements under the equity method. The Group's share of the profit or loss of joint ventures is shown in the consolidated statement of comprehensive income as a separate line above Operating profit. Group's investments in the joint ventures upon the date of acquisition, adjusted for changes in the joint ventures equity after the date of acquisition, are shown in the consolidated statement of financial position under "Shares in joint ventures".

FOREIGN CURRENCY TRANSLATION

Items concerning the performance and financial position of the Group's units are measured using the currency of the primary economic environment in which the entities operate ("the functional currency"). The consolidated financial information is presented in euros, which is the functional and presentation currency of the parent company.

FOREIGN CURRENCY TRANSACTIONS

Foreign currency transactions are recorded in the functional currency using the rate of exchange prevailing at the transaction date. In practice, it is often necessary to use a rate that is close to the rate of the transaction date. Foreign currency monetary items are translated into the functional currency using the rates of the last trading day of the reporting period. Foreign currency non-monetary items, which have been recognised at fair value, are translated into

the functional currency using the rate of fair value measurement date. Otherwise, non-monetary items are translated using the rate of the transaction date. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities are recognised in the income statement. The foreign exchange gains and losses from operating activities are included in the respective items above operating profit. The currency exchange gains and losses are included in the financial income and financial expenses.

TRANSLATING THE CURRENCY OF THE FINANCIAL STATEMENTS OF FOREIGN ENTITIES

Income statements of foreign entities are translated into euros at the weighted average exchange rates for the year, while balance sheets are translated using the exchange rates of the last trading day of the reporting period. The translation of the profit (loss) for the period using different rates in the consolidated statement of comprehensive income and the balance sheet causes a translation difference, which is recognised in equity and whose adjustment is recognised in other comprehensive income items. Translation differences arising from the elimination of the acquisition cost of foreign subsidiaries and the translation of the accumulated equity items after the acquisition are recognised in other comprehensive income items. When the control over a subsidiary changes, the accumulated translation differences are recognised as part of capital gain or loss. Fair value adjustments and goodwill arising from acquisitions of foreign entities are treated as assets and liabilities of the foreign entities in their functional currency. They are translated into euros at the rate of the last trading day of the reporting period.

INTANGIBLE ASSETS

GOODWILL

Goodwill represents the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets.

Goodwill is not amortised but tested annually for impairment, and whenever there is an indication that the asset may be impaired. For this purpose, goodwill is allocated to cash-generating units. Goodwill is carried at cost less any accumulated impairment losses.

CUSTOMER RELATIONSHIPS AND DEPOT NETWORK

In business combinations part of the purchase price has been allocated to customer relationships and depot network. Initial measurement of customer

relationships has been prepared by applying the Multi-period Excess Earnings Method. The depot network has been measured based on estimated benefit gained, compared to the earnings of a depot in the normal course of business with the earnings of a start-up depot.

BRAND AND CO-BRAND

Brands and co-brands have been generated through the business combinations. Useful life of the Group's main brand "Cramo" has been defined indefinite because there is no foreseeable limit to the period over which the asset is expected to generate cash flows. The Cramo brand is not amortised but tested annually for impairment. The Cramo brand has been considered a corporate-level asset and for testing purposes the brand is reallocated to cash generating units based on sales. The reallocation of the assets to units is presented in note 5. The brand is carried at cost less any accumulated impairment losses.

Brands acquired in the business combinations are measured applying the relief-from-royalty method regardless of whether the Group intends to use the brand. These co-brands are of temporary nature and they are amortised according to the diminishing balance method over the economic useful lives of 1-10 years. The method reflects the higher importance of the brand right after the acquisition. The co-brand is allocated to the same segment as the business combination.

RESEARCH AND DEVELOPMENT

Research costs are expensed as incurred. Development costs are capitalised when it is probable that a development project will generate future economic benefits, and the cost can be measured reliably. Other development costs are expensed.

Currently the development projects of the Group do not fulfil the criteria of capitalisation and thus the development costs are expensed as incurred.

OTHER INTANGIBLE ASSETS

Intangible assets are recorded in the balance sheet initially at cost, when it is probable that the assets will generate future economic benefits and the cost can be measured reliably. Those intangible assets with a finite useful life are amortised on a straight-line basis over their expected lives. Intangible assets with indefinite useful lives are not amortised but tested annually for impairment.

Amortisation periods for intangible assets are:

Customer relationships	3–10 years
Depot network	10–20 years
Co-brands	1–10 years
Other intangible assets	2–8 years

Amortisation of intangible assets is started when they are available for use,

i.e. in the location and condition necessary to operate in a manner intended by the management.

TANGIBLE ASSETS

Tangible assets are stated at cost less accumulated depreciation and any impairment losses. This cost includes expenditure that is directly attributable to the acquisition. Tangible assets acquired in the business combinations are measured at fair value at the date of acquisition. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset when it is probable that they will generate future economic benefits, and the cost can be measured reliably. The expenditure on repairs and maintenance of tangible assets are recognised as expense when incurred.

Tangible assets are depreciated on a straight-line basis over the estimated economic useful lives as follows:

Buildings and structures	10–35 years
For rental:	
Modular space	10–15 years
Machinery and equipment	3–10 years
Machinery and equipment for services	6–10 years
Machinery and equipment for own use	3–6 years
Other tangible assets	3–10 years

Depreciation of an asset is started when it is available for use, i.e. in the location and condition necessary to operate in a manner intended by the management. Depreciations of the rental machinery and equipment are started when they are available for rent.

The residual value and useful life of the assets are reviewed at least at the end of each financial year and, if necessary, adjusted to reflect any changes in expectations of economic value.

Gains or losses on disposal are recognised through profit and loss and presented as other operating income.

GOVERNMENT GRANTS

Grants from the government are recognised as reductions of the carrying amount of tangible assets where there is a reasonable assurance that the grant will be received and the Group will comply with all inherent conditions. Grants are recognised in the consolidated statement of comprehensive income in the form of smaller depreciation over the economic life of the related asset. Research and development grants and grants received as reimbursement for actual costs are charged to profit during the period in which the right to collect the grant emerge. Such grants are presented in other operating income.

IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

The Group assesses at each balance sheet date whether there are indications that the carrying amount of an asset may not be recoverable. If such indications exist, the recoverable amount of the asset in question will be measured. In addition, the recoverable amount will be estimated annually from the following assets whether there are indications of impairment or not: goodwill, intangible assets with indefinite useful lives and intangible assets not yet available for use. For the purposes of assessing impairment, assets are examined at the level of cash-generating units, i.e. at the lowest level that is mainly independent of other units and for which there are separately identifiable cash flows, largely independent from those of corresponding units.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The value in use is determined by reference to discounted future cash flows expected to be generated by the asset. The discount rate used is pre-tax and reflects the time value of money and asset specific risks.

Impairment loss is recognised when the carrying amount of the asset is greater than its recoverable amount. Impairment loss is charged directly to the consolidated statement of comprehensive income. If a cash-generating unit is subject to an impairment loss, it is allocated first to decrease the goodwill and subsequently, to decrease the other assets of the unit. At recognition of the impairment loss, the useful life of the assets amortised is reassessed. Impairment loss from other assets than goodwill is reversed in the case that a change has occurred in the estimates used in measuring the recoverable amount of the asset. The increased carrying amount must not, however, exceed the carrying amount that would have been determined had no impairment loss been recognised in prior years. Previously recognised impairment loss of goodwill is not reversed in any circumstance.

RENTAL CONTRACTS

LESSEE

The rental agreements concerning tangible assets where the Group carries a significant share of the risks and rewards incidental to ownership are classified as financial leasing contracts. Assets acquired through financial leasing are capitalised at the lease's commencement at the lower of the fair value of the leased asset and the present value of the minimum lease payments. The tangible assets acquired under finance leases are depreciated over the economic useful life of the asset or the lease term, if there is uncertainty about the acquisition of ownership at the end of the

rental period. Lease payments are allocated between the liability and finance costs so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Rental liabilities are included in financial liabilities.

Leases where the risks and rewards of ownership are retained by the lessor are treated as operating leases. Other operating lease payments are treated as rentals and charged to the consolidated statement of comprehensive income on a straight-line basis over the lease term.

LESSOR

Leased assets are included in tangible assets in the balance sheet and depreciated over their useful lives in the same way as corresponding tangible assets in the company's own use are.

Rental revenue recognition is presented in Accounting Principles under the section "Principles of revenue recognition".

FINANCIAL ASSETS AND LIABILITIES

FINANCIAL ASSETS

The Group classifies its financial assets in the following categories; a) financial assets at fair value through profit and loss, b) loans and receivables, and c) available-for-sale financial assets. The Group, however, does not currently have any material available-for-sale financial assets. The classification of assets is performed upon the initial recognition and determined in line with the aim of the asset, and re-evaluation is done on a regular basis. Assets with maturities under 12 months are included in the balance sheet under current assets, and those with maturities over 12 months under non-current assets.

a) *Financial assets at fair value through profit and loss*

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless hedge accounting is applied. Assets in this category are classified as current assets.

b) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. Loans are shown as a separate line, and other other receivables are classified as trade and other receivables in the balance sheet in Note 11 Trade and other receivables.

Purchases and sales of financial assets

are recognised on the trade date, which is the date that the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit and loss.

Financial assets carried at fair value through profit and loss, are initially recognised at fair value, and transaction costs are expensed in the consolidated statement of comprehensive income. Financial assets at fair value through profit and loss are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest rate method.

c) *Available-for-sale financial assets*

Available-for-sale financial assets are usually carried at fair value. All unrealised gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised in other comprehensive income items. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recorded in other comprehensive income items are recognised in the financial income and expenses of the consolidated statement of comprehensive income. However, due to their immaterial nature for the Group, it was decided in 2014 to reclassify available-for-sale financial assets to be measured at historical cost.

Financial assets are derecognised when the rights to receive cash flows from the investment have expired or have been transferred, and the Group has substantially transferred all risks and rewards of ownership.

IMPAIRMENT OF FINANCIAL ASSETS

The book values of assets are reviewed regularly, at least annually, in order to assess whether an asset has been impaired. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In assessing impairment both external and internal sources of information are considered. External sources include a significant decline in market value that is not result of the passage of the time or a normal use of the assets or increase in interest rates. Internal sources of information include evidence of the obsolescence of, or damage to, an asset.

FINANCIAL LIABILITIES

Interest-bearing liabilities are recognised initially at fair value, net of transaction costs incurred. Subsequently, they are measured at amortised cost using the effective interest method. Interest-bearing liabilities are included in both current and non-current liabilities. Unless the Group has a non-contingent right to postpone the amortisation

1 of a liability by a minimum of 12 months from
2 the balance sheet date, it is classified as
3 current.

4 Borrowing costs are recognised in
5 the accounting period during which they
6 have incurred. Credit fees related to loan
7 commitments are recognised as transaction
8 costs to the extent that it is probable that
9 the total loan commitment or a part of it will be
10 raised. This means that the fee is recognised
11 in the balance sheet until the loan is raised. In
12 connection with the drawdown, the credit fee
13 related to loan commitments is recognised
14 as part of the transaction costs. To the extent
15 that it is probable that the loan commitment
16 will not be raised, the credit fee is recognised
17 as prepaid expense in respect of the liquidity
18 related services and is accrued for period of
19 the loan commitment.

20 For the measurement policies of the fair
21 values of all financial assets and liabilities,
22 refer to note 9 Fair values of financial assets
23 and liabilities.

24 DERIVATIVE FINANCIAL 25 INSTRUMENTS AND HEDGING 26 ACTIVITIES

27 Derivatives are initially recognised at fair
28 value on the date a derivative contract is
29 entered into, and are subsequently re-
30 measured at their fair value. The method
31 of recognising the resulting gain or loss
32 depends on whether the derivative is
33 designated as a hedging instrument, and
34 if so, the nature of the item being hedged.
The Group designates certain derivatives as
either:

- a) Hedges of the fair value of recognised liabilities (fair value hedge); or
- b) Hedges of a particular risk associated with a recognised liability or a highly probable forecast transaction (cash flow hedge).

The Group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised in profit or loss and presented in the comprehensive income statement within financial items. Amounts accumulated in equity are transferred to the comprehensive income statement and classified as income or expense in the same period when the hedged item affects the

comprehensive income statement.

The gain or loss relating to the effective portion of an interest rate swap hedging variable rate borrowings is recognised in other comprehensive income. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity until the forecast transaction is ultimately recognised in the comprehensive income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to profit or loss and presented in the comprehensive income statement within financial items.

Derivatives, which are entered in with hedging purposes, but for which hedge accounting is not applied or cannot be applied are measured at fair value through profit and loss. Changes in the fair value of these derivative instruments are recognised immediately through profit or loss and presented in the comprehensive income statement within financial items.

The fair values of various derivative instruments used for hedging purposes are disclosed in note 10 Financial risk management. Movements of the hedging fund in shareholders' equity are shown in note 14 Share capital and equity funds. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Derivatives, for which hedge accounting is not applied, are classified as a current asset or liability.

INVENTORIES

Inventories are measured at the lower of cost and net realisable value. Cost is determined using the first-in, first-out (FIFO) method. The cost of inventories shall comprise all costs of purchase including transport, handling and other costs directly attributable to the acquisition. Net realisable value is the estimated selling price in the ordinary course of business, less the cost of selling.

TRADE RECEIVABLES

Trade receivables are recognised in the amount of their initial billing. Impairment is recognised when there is objective evidence suggesting that impairment loss has been identified. The Group has established a uniform basis for the determination of impairment of trade receivables based on the time receivables have been overdue. In addition, impairment is recognised if there is otherwise some evidence of the debtor's insolvency, bankruptcy or liquidation.

Credit losses are recognised as an expense in other operating expenses.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents, which include cash accounts and short-term cash deposits at banks, have maturities of up to three months. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

Non-current assets or a group of disposed items and the assets and liabilities related to discontinued operations are reclassified as held for sale if their amount corresponding to their carrying amount will accrue principally from the sale of assets instead of continuing use. From the date of the classification, the assets held for sale or groups of disposed items are measured at the lower of their carrying amount or the fair value less costs to sell. Depreciation of these assets is ceased on the date of classification.

The result of discontinued operations is presented as a separate item in the Group's comprehensive income statement. Assets held for sale, groups of disposed items, and items which relate to assets held for sale are recognised in other comprehensive income items, as well as liabilities included in the groups of disposed items are presented separately from other items in the balance sheet.

The Group did not have any non-current assets held for sale or discontinued operations during the financial years included in the financial statements.

EQUITY

Equity shares are presented as issued share capital. Costs related to the issue of equity instruments or to an acquisition are presented as a reduction in share capital.

When any Group company purchases the parent company's shares (treasury shares), the consideration paid, including any directly attributable incremental costs, net of tax, is deducted from equity attributable to the owners of the parent company.

In the option plans the proceeds gained from share subscriptions, adjusted by possible transaction costs, are recorded according to the conditions of the plans into the invested unrestricted equity fund.

PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognised when the Group has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made. Provisions are measured at the present value of the

required payments to cover the obligation. For the calculation of the present value, the chosen discount rate is one that reflects the time value of money and the risks included in the obligation at the time of observation. If it is possible to receive reimbursement for part of the obligation from a third party, the reimbursement is stated as a separate asset when receipt is practically certain.

A contingent liability is a possible obligation, incurred as a result of earlier events, whose existence is confirmed only when an uncertain event outside the control of the Group is realised. An existing liability that is not likely to require the fulfilment of the payment obligation or whose amount cannot be reliably measured is also considered a contingent liability. Contingent liabilities are disclosed in note 19 Collaterals and contingent liabilities.

EMPLOYEE BENEFITS

RETIREMENT BENEFIT OBLIGATIONS

Pension plans are classified as defined benefit or defined contribution plans. In defined contribution plans, the Group makes fixed payments to separate entities. The Group has no legal or constructive obligation to make additional payments if the party receiving them is unable to pay the pension benefits in question. All arrangements that do not fulfil these conditions are considered defined benefit pension plans. The payments made to defined contribution pension plans are recognised in the comprehensive income statement in the period to which the contributions relate.

The Group currently operates only such defined benefit pension plans, in which all beneficiaries are already retired. The liability (or asset) recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The present value of the defined benefit obligation is calculated by using discount rate, which reflects the market yield of high quality corporate bonds. Net interest cost of the net defined liability is recognised in the comprehensive income statement as finance costs. Re-measurements from experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income items as they occur.

SHARE-BASED PAYMENTS

The Group has the following share-based compensation plans: performance share plans and share savings plans.

In performance share plans the target group has an opportunity to earn company shares as a reward on the basis of achievement of targets established for the performance criteria for each calendar year. Part of the reward is paid in cash to

cover taxes and tax-related costs arising from the reward. The rewards are paid to the target group approximately two years after the confirmation of the reward, if the service conditions are met. The fair value of the equity-settled payment is determined at grant date and expensed during the vesting period, the corresponding amount being charged to equity. The total amount to be expensed over the vesting period is determined based on the Group's estimate on the number of the shares that are expected to be vested by the end of the vesting period. The impact of any non-market vesting conditions (EPS-target) has been excluded, but they are included in the assumptions about the number of shares that are expected to be distributed. On each reporting date the Group revises its estimate on the number of shares that are expected to be distributed. The impact of the revision of the original estimates is recognized in the consolidated statement of comprehensive income. The fair value of the cash-settled payment is measured on each reporting date and presented as a liability. The cash-settled payment is recognised as an expense during the vesting period. Any changes in the estimates are recognised in the comprehensive income statement.

In share savings plans the employees can save 2-5% of their monthly gross salaries during the 12 months' plan periods and the savings are automatically used to purchase company shares for the participants quarterly after each publication date of the interim results during the plan period. The participant will receive one free matching share for every two acquired savings shares, if the participant holds the acquired shares until the end of the designated holding period. An additional requirement for receiving the matching shares is that the participant's employment has not been terminated before the end of the designated holding period. The first savings period started on 1 October 2012 and the corresponding matching shares are paid during 2016. The matching shares are paid partly in cash to cover tax and other tax related costs arising from the reward. The fair value of the equity-settled payment is determined at the date of acquisition of the savings shares. The fair value of the cash-settled part of the reward is determined at the acquisition of the savings shares and re-measured on each reporting date. The expenses of the share savings plan are recognized during the vesting period.

Share-based payments are presented in note 29.

PRINCIPLES OF REVENUE RECOGNITION

Group's revenues mainly comprise of rental revenue of construction equipment and modular space, rental related services and trading of construction and other equipment.

Rental related sales include especially assembly, disassembly and transportation services, as well as construction site circumstance control and maintenance services. Product and service sales are recognised at fair value net of indirect taxes, discounts and exchange differences of currency sales.

RENTAL SALES

Rental revenues from the rental agreements of equipment, machines and modular space are recognised as sales income in equal amounts over the lease term.

TRADING SALES AND RENTAL-RELATED SERVICES

Sales of goods are recognised when the significant risks and rewards of ownership, interests and control have been transferred to the buyer. This mainly occurs in connection with the contractual transfer of the goods. Revenues from the services are recognised as sales in the accounting period during which the service is performed.

PROCEEDS ON SALE OF USED EQUIPMENT

Net gains/ net losses on sale of used rental equipment are presented as other operating income. The sale is recognised when the significant risks and rewards of ownership, interests and control have been transferred to the buyer. This mainly occurs in connection with the contractual transfer of the goods.

INTEREST AND DIVIDENDS

Interest income is recognised using the effective interest rate method. Dividend yield is recognised when the right to dividend is established.

TAXES BASED ON TAXABLE INCOME AND DEFERRED TAXES

Tax expense consists of the taxes based on taxable income and deferred taxes for the current accounting period. Taxes are recognised through profit and loss, except when they relate directly to equity or the items recognised in the other comprehensive income items. In such cases, tax is also charged to these items. Taxes based on taxable income for the current period are calculated based on the effective tax rate of each country.

Deferred taxes are calculated for temporary differences between the book values of assets and liabilities and the tax basis of assets and liabilities. Deferred tax liabilities are not recognised, however, if they are attributable to the initial recognition of an asset or liability in a transaction other than business combination and the transaction, at the time it occurs, does not affect the accounting profit or taxable profit. The deferred tax for investments in subsidiaries and joint ventures is recognised, except when

1 the timing of the reversal of the temporary
2 difference is controlled by the Group and it is
3 probable that the temporary difference will
4 not be reversed in the foreseeable future.
5 The most significant temporary differences
6 arise from the depreciation of tangible assets
7 items; the measurement of derivative financial
8 instruments at fair value; unutilised tax losses
9 and fair value adjustments made in connection
10 with acquisitions.

11 Deferred taxes are calculated using the tax
12 rates enacted by the final day of the reporting
13 period or those which have, in practice, been
14 accepted by the final day of the reporting
15 period. Deferred tax assets are recognised to
16 the extent that it is probable that future taxable
17 profit will be available against which the
18 temporary differences can be utilised.

19 DIVIDEND DISTRIBUTION

20 The dividend proposed by the Board of
21 Directors to the Annual General Meeting
22 has not been deducted from equity; instead,
23 dividends will be recognised after a decision
24 has been made on the matter at the Annual
25 General Meeting.

26 ACCOUNTING PRINCIPLES REQUIRING 27 DISCRETION BY MANAGEMENT AND 28 CRITICAL FACTORS OF UNCERTAINTY 29 ASSOCIATED WITH ESTIMATES

30 Estimates and assumptions regarding
31 the future have to be made during the
32 preparation of financial statements, and
33 the outcome may differ from the estimates
34 and assumptions made. Furthermore, the
application of accounting principles requires
consideration.

35 MANAGEMENT CONSIDERATION IN 36 CHOOSING AND APPLYING ACCOUNTING 37 PRINCIPLES TO FINANCIAL 38 STATEMENTS

39 It is the duty of the Group's management to
40 make judgements relating to the choice and
41 application of the accounting policies of the
42 financial statements. This is especially true in
43 those cases where the operative IFRSs allow
44 alternative ways of recognition, measurement
45 or presentation.

46 The most significant sector in which
47 the management has applied the above-
48 described discretion relates to rental
49 agreements of tangible assets (with the
50 Group as lessee) and the economic useful
51 lives of tangible assets.

52 FACTORS OF UNCERTAINTY ASSOCIATED 53 WITH ESTIMATES

54 The estimates made when preparing
the financial statements are based on
the management's best knowledge of
current events and actions at balance
sheet date. Forming the background of
these estimates are previous experiences
and assumptions of the future which are
considered the most probable at the date of

the financial statement's preparation. These
assumptions concern, among other things,
the development of the Group's sales and
level of costs. The management together
with business units follow the realisation of
these assessments and assumptions and
the changes in background factors regularly
using several internal as well as external
sources of information. Possible changes to
estimations and assumptions are recorded
in accounting in the reporting period during
which one or both of them are adjusted and in
all consecutive years.

The critical assumptions concerning
the future and the factors of uncertainty
associated with estimates made on the final
day of the reporting period which cause a
significant risk to the stability of the Group's
book value of assets and liabilities during
the following financial year are presented
below. The Group's management consider
these sections of the financial statements
the most crucial, because the accounting
principles involved are the most complicated
from the point of view of the Group and their
application requires the use of significant
estimations and assumptions more than any
other in, for example, the measurement of
assets. Furthermore, the effects of possible
changes on the actual facts behind these
assumptions and assessments are expected
to be the greatest.

55 *Impairment testing*

In order to observe possible impairment and
to prevent it, the Group performs annual
tests of goodwill, intangible assets not yet
available for use and intangible assets with
indefinite useful life. In addition, any signs
of impairment are carefully estimated following
the principles described above in accounting
policies. The recoverable amounts of the
cash generating units are defined using
calculations based on value in use. In these
calculations, cash flows are based on the
financial plans approved by the management
which cover a period of 5 years.

More information on the sensitivity of
recoverable amounts to changes in used
assumptions is provided in the note 5
Impairment testing of goodwill and other
intangible assets with indefinite useful life.

56 *Valuation of the rental equipment fleet*

The optimisation of rental fleet's utilisation
rate is managed on the Group level. Testing
of the value of the rental fleet is based on
calculations of value in use, taking into
account the possibility of transferring it to
another entity of the Group. The preparation
of these calculations requires estimations.

57 *Determining the fair value of the assets acquired through business combinations*

With regard to tangible assets, the Group's
financial department and if necessary Fleet
Management makes comparisons to the

market prices of corresponding assets, as
well as estimates of the decrease in value
attributable to the age, wear and tear and
other similar factors of acquired assets.
The determination of the fair value of
intangible assets is based on assessments
concerning the cash flows of assets, because
information on the sales of similar assets
has not been available. More information
on the measurement of intangible assets
acquired through business combinations is
presented in note 6 Business combinations.
Management believes that the estimations
and assumptions used are a sufficiently
accurate basis for the determination of fair
value. In major business combinations, the
Group utilises an outside advisor to estimate
the fair values of tangible and intangible
assets. Furthermore, possible signs of
impairment in both tangible and intangible
assets are discussed and considered at the
least at each balance sheet date.

58 *Income taxes*

The Group is subject to tax in several
countries. Determining the Group's
income tax requires significant
assessment. The quantification of the final
tax for many transactions and calculations
of normal business is uncertain. In
2013, the Finnish Tax Administration
issued a residual tax decision, total
amount of EUR 9.7 million, for Cramo
Plc concerning 2009-2012. According to
the decision, the interest income from
Cramo's financing company in Belgium
should have been taxed in Finland. Cramo
Plc has paid the taxes in Belgium and
appealed against the decision. In 2015, the
Assessment Adjustment Board changed
the tax decision, and the Finnish Tax
Administration paid Cramo Plc a EUR
8.3 million tax refund. Cramo Plc has
appealed to an Administrative Court in
Finland against the approximately one-
million-euro tax penalty. The tax payment
is recognised as an income tax receivable.
Cramo Plc has submitted the case to the
mutual agreement procedure (the MAP
process) between Belgium and Finland,
to the extent that Cramo has been
subjected to double taxation, pursuant to
the changed tax decision. Based on the
tax decision concerning 2009-2012 from
the Finnish Tax Administration, Cramo Plc
has by its own initiative amended financial
year 2013 taxation by increasing taxable
income with EUR 8.3 million. Cramo
Plc has made a change appeal to the
Finnish Tax Administration in Spring 2016
concerning year 2013 taxation.

Deferred taxes are presented in note 8
Deferred taxes.

59 *Share-based payments*

The Group has share-based compensation
plans. The fair value of reward shares in

the performance share plan is based on the share price on the grant date and the valuation does not involve high degree of estimation. Instead, the determination of the fair value of matching shares in the One Cramo Share savings plan includes certain assumptions relating to expected dividend yield and cost of equity and debt. These variables make fair value estimation difficult. These assumptions are described in note 29 Share-based payments.

NEW AND AMENDED STANDARDS APPLIED IN FINANCIAL YEAR END

The Group has applied as from 1 January 2016 the following new and amended standards that have come into effect.

- Annual Improvements to IFRSs (2012-2014 cycle) (effective for financial years beginning on or after 1 January 2016). The annual improvements process provides a mechanism for minor and non-urgent amendments to IFRSs to be grouped together and issued in one package annually. The cycle contains amendments to four standards. Their impacts vary standard by standard but are not significant.
- Amendment to IAS 1 Presentation of Financial Statements: Disclosure Initiative (effective for financial years beginning on or after 1 January 2016). The amendments clarify the guidance in IAS 1 in relation to applying the materiality concept, disaggregating line items in the balance sheet and in the statement of profit or loss, presenting subtotals and to the structure and accounting policies in the financial statement. The amendments have had a minor impact on presentation in the Group's consolidated financial statements.
- Amendments to IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets - Clarification of Acceptable Methods of Depreciation and Amortisation (effective for financial years beginning on or after 1 January 2016). The amendments state that revenue-based methods of depreciation cannot be used for property, plant and equipment and may only be used in limited circumstances to amortise intangible assets if revenue and the consumption of the economic benefits of the intangible assets are highly correlated. The amendments have had no impact on the Group's consolidated financial statements.
- Amendments to IFRS 11 Joint Arrangements - Accounting for Acquisitions of Interests in Joint Operations (effective for financial years beginning on or after 1 January 2016). The amendments require

business combination accounting to be applied to acquisitions of interests in a joint operation that constitutes a business. The amendments have had no impact on the Group's consolidated financial statements.

ADOPTION OF NEW AND AMENDED STANDARDS AND INTERPRETATIONS APPLICABLE IN FUTURE FINANCIAL YEARS

The Group has not yet adopted the following new and amended standards and interpretations already issued by the IASB. The Group will adopt them as of the effective date or, if the date is other than the first day of the financial year, from the beginning of the subsequent financial year.

* = not yet endorsed for use by the European Union as of 31 December 2016.

- IFRS 15 Revenue from Contracts with Customers (effective for financial years beginning on or after 1 January 2018). The new standard replaces current IAS 18 and IAS 11 -standards and related interpretations. In IFRS 15 a five-step model is applied to determine when to recognise revenue, and at what amount. Revenue is recognised when (or as) a company transfers control of goods or services to a customer either over time or at a point in time. The standard introduces also extensive new disclosure requirements. Followings is a description of how key concepts of IFRS 15 are analysed for different revenue streams, what the expected effect of IFRS 15 transition are in the Group, as well as timeline for implementing IFRS 15 and the transition options to be used.

The Group's rental revenues from the rental of equipment, machines and modular space are recognized as income under IAS 17 Leases standard. The rental revenues recognized under lease-standard comprise 84 % (2015: 76 %) of the Group's total revenue. Rental related services are recognized under IFRS 15, and comprise 17 % (2015: 24 %) of the Group's total revenue.

Customer contracts of equipment and machine rentals are generally short-term rental agreements. Machine and equipment rental also includes separate service agreements, to which IFRS 15 will be applied. Modular space customer agreements include long-term, fixed-term project agreements of typically from two to five-year duration. These project agreements include assembly, transportation and disassembly services.

The Group has estimated, that IFRS 15 practical impacts will concern the long-term modular space project agreements with significant service and rental charge component. Transaction price of the agreement is allocated based on

stand-alone selling prices on the service and rental component, which in IFRS 15 transition will lead to reallocations between these components. It is not yet possible to assess the reallocation amount reliably. The adjustment will be recorded in non-current retained earnings on the transition date to IFRS 15 and it will especially be caused by a slight timing change of revenue recognition and reallocation of the transaction price between lease income and rental related services income.

The Group considers assembly service together with related transportation element as one performance obligation; and disassembly service together with related transportation as another. Other services of the Group are all separate performance obligations. This corresponds mainly current praxis of the Group. Performance obligations are recognized in the accounting periods, during which the service is rendered. Revenue on open customer contracts at the transition date 1 Jan 2018 will be recognized somewhat earlier, which will create a slight effect on retained earnings. Contractual receivables and payables will according to IFRS 15 be presented as net position.

The group has decided to apply the cumulative effect approach of IFRS 15 standards transition option, meaning that open contracts at Jan 1 2018 will be restated into IFRS 15 and cumulative effect of the change will be recorded against retained earnings. Financial statements for financial year 2018 are accounted for and reported under IFRS 15, but disclosure for financial year 2018 will be provided both according to IFRS 15 and IAS 18/ IAS 11.

- Amendments to IFRS 15 - Clarifications to IFRS 15 Revenue from Contracts with Customers* (effective for financial years beginning on or after 1 January 2018). The amendments include clarifications and further examples on how to apply certain aspects of the five-step recognition model. The impact assessment of the clarifications has been included in the IFRS 15 impact assessment described above.
- IFRS 9 Financial Instruments (effective for financial years beginning on or after 1 January 2018). IFRS 9 replaces the existing guidance in IAS 39. The new standard includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment on financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and

derecognition of financial instruments from IAS 39. The impacts of IFRS 9 on the Group's consolidated financial statements have been assessed and the Group estimates, that IFRS 9 will not have any material impact on valuation of Cramo Group's financial instruments compared with present IAS 39. Some impact is estimated to take place in impairment process design. Largest impact of IFRS 9 are expected to be in qualitative information of the Financial Statements notes:

- description of the Group's risk control strategy and targets linked to hedge accounting; and
 - description how the Group measures and controls credit risk.
- IFRS 16 Leases* (effective for financial years beginning on or after 1 January 2019). The new standard replaces the current IAS 17 –standard and related interpretations. IFRS 16 requires the lessees to recognise the lease agreements on the balance sheet as a right-of-use assets and lease liabilities. The accounting model is similar to current finance lease accounting according to IAS 17. There are two exceptions available, these relate to either short term contracts in which the lease term is 12 months or less, or to low value items i.e. assets of value USD 5 000 or less. The lessor accounting remains mostly similar to current IAS 17 accounting. The preliminary impact assessment of the standard has been started in the group. Accordingly, the impact on the Group's consolidated financial statements is expected to be significant.

As lessor, the accounting remains materially unchanged compared to current IAS 17 standard. However, from the date of IFRS 15 adoption as described above, the relative stand-alone selling price allocation between lease revenue and rental related service sales of Modular Space contracts will change the amount of revenue recognized between these components.

The Group estimates, that IFRS 16 has significant impact on Cramo Group statement of financial position as lessees are required to recognise a lease liability reflecting future lease payments and a right-of-use-asset for virtually all lease contracts. The Group has several types on operative lease contracts according to current IAS 17. These include depot and premises contracts with varying non-cancellable lease periods, operative car lease contracts, and different types of machines financed through operative lease contracts. Depot and premises lease contracts are expected to form the largest impact at IFRS 16 transition.

Financial result of the Group is not expected to be materially affected, but there are remarkable effects on the Group's income statement lines as e.g. other operating expenses will decrease while depreciation of tangible assets will increase considerably. Cash flow statement will be affected by change between operating and financing cash flows. The Group is currently assessing the full effects for Cramo Group as lessee.

- Amendments to IAS 7 Statement of Cash Flows- Disclosure Initiative* (effective for financial years beginning on or after 1 January 2017). The changes were made to enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flow and non-cash changes. The amendments have an impact on the disclosures in the Group's consolidated financial statements.
- Amendments to IAS 12 Income Taxes - Recognition of Deferred Tax Assets for Unrealised Losses* (effective for financial years beginning on or after 1 January 2017). The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. The amendments have no significant impact on the Group's consolidated financial statements.
- Amendments to IFRS 2 Share-based payments - Clarification and Measurement of Share-based Payment Transactions * (effective for financial years beginning on or after 1 January 2018). The amendments clarify the accounting for certain types of arrangements. Three accounting areas are covered: measurement of cash-settled share-based payments; classification of share-based payments settled net of tax withholdings; and accounting for a modification of a share-based payment from cash-settled to equity-settled. The amendments are estimated not to have significant impact on the Group's consolidated financial statements.
- Amendments to IFRS 4 Insurance Contracts - Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts* (effective for financial years beginning on or after 1 January 2018). The amendments respond to industry concerns about the impact of differing effective dates by allowing two optional solutions to alleviate temporary accounting mismatches and volatility. The amendments have no impact on

the Group's consolidated financial statements.

- Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture * (the effective date has been postponed indefinitely). The amendments address to clarify the requirements in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments have no impact on the Group's consolidated financial statements.
- IFRIC 22 Interpretation Foreign Currency Transactions and Advance Consideration* (effective for financial years beginning on or after 1 January 2018). When foreign currency consideration is paid, or received in advance of the item it relates to – which may be an asset, an expense or income – IAS 21 The Effects of Changes in Foreign Exchange Rates is not clear on how to determine the transaction date for translating the related item. The interpretation clarifies that the transaction date is the date on which the company initially recognises the prepayment or deferred income arising from the advance consideration. For transactions involving multiple payments or receipts, each payment or receipt gives rise to a separate transaction date. The group is currently assessing the impacts of the interpretation.
- Amendments to IAS 40 Investment Property - Transfers of Investment Property* (effective for financial years beginning on or after 1 January 2018). When making transfers of an investment property, the amendments clarify that a change in management's intentions, in isolation, provides no evidence of a change in use. The examples of evidences of a change in use are also amended so that they refer to property under construction or development as well as to completed property. The amendments have no impact on the Group's consolidated financial statements.
- Annual Improvements to IFRSs (2014-2016 cycle)* (effective for financial years beginning on or after 1 January 2017 for IFRS 12 and on or after 1 January 2018 for IFRS 1 and IAS 28). The annual improvements process provides a mechanism for minor and non-urgent amendments to IFRSs to be grouped together and issued in one package annually. The cycle contains amendments to three standards. Their impacts vary standard by standard but are not significant.

2. SEGMENT REPORTING

The Group's management has determined the operating segments based on management reporting regularly reviewed by the Group's chief operating decision maker. Group management has been identified as the chief operating decision maker. The operating segment structure reflects the structure, in which equipment rental and modular space businesses have been combined under the management of each country. The modular space business is also monitored at product area level. In addition to segment information, Cramo discloses additional financial information by product areas for equipment rental and modular space. The reporting of the modular space order book value is also continued.

Cramo Group's business structure consists of the following reportable segments:

- Finland
- Sweden
- Norway
- Denmark
- Central Europe
- Eastern Europe*

* Fortrent joint venture in Russia and Ukraine, owned and controlled 50/50 by Cramo and Ramirent, is presented under the Eastern Europe segment. Cramo's share (50 per cent) of the profit/loss is included in EBITA (operating profit before amortisations and impairment on intangible assets resulting from acquisitions) of the Eastern Europe reportable segment in accordance with the equity method of accounting.

In all of its operating segments, Cramo provides modern rental solutions through the Cramo Rental Concept. Under the Cramo Rental

Concept, construction companies and customers in trade, industry and the public sector, as well as private customers, are provided with machinery, equipment and modular space through different rental solutions and services.

The information reported for each segment is the measure, which Group management uses internally for evaluating segment performance and deciding on how to allocate resources to operating segments.

The performance of an operating segment is evaluated primarily based on the segment's EBITA, which refers to operating profit before amortisation and impairment on intangible assets resulting from acquisitions. According to management's view, this is the most appropriate measure when comparing how the segment performance and the performance of other companies engaged in the same industry stand vis-à-vis each other. The figures provided to Group management in respect of segment profitability are measured on a basis consistent with the consolidated financial statements.

The figures provided to Group management in respect of segment assets and liabilities are measured on a basis consistent with the consolidated financial statements. Assets and liabilities are allocated to the segments based on segment operations. The allocation of segment assets and liabilities is in line with the information reported to Group management. Unallocated assets and liabilities comprise financial receivables, deferred tax assets and liabilities, income tax receivables and payables, derivatives, cash and cash equivalents and interest-bearing liabilities.

Inter-segment transactions are based on commercial terms.

Net book value:					
At 1 Jan 2015	1,680	8,129	615,401	527	625,738
At 31 Dec 2015	1,706	8,730	674,624	1,849	686,909
At 31 Dec 2016	1,707	7,419	738,996	2,388	750,509

Net book value of tangible assets increased by EUR 63.6 million from EUR 686.9 million to EUR 750.5 million in 2016. The net book value increased mainly due to investments (EUR 199.2 million) and business acquisitions (EUR 3.3 million), which were above the level of depreciation and impairment losses (EUR 108.8 million) and asset reductions (EUR 63.0 million). Exchange differences decreased the net book value by EUR 9.1 million.

Machinery and equipment includes assets acquired through finance lease contracts. Acquisition cost of such equipment at the end of period was EUR 46.0 (78.4) million, accumulated depreciation EUR 30.8 (43.4) million and net book value EUR 15.2 (35.0) million.

Investment commitments are presented in note 19.

At 31 Dec 2015	151,142	29,500	99	3,855	25,484	718	93	8,430	219,320
At 31 Dec 2016	147,985	27,608	0	2,277	22,164	746	39	10,018	210,836

Net book value of goodwill and intangible assets decreased by EUR 8.5 million from EUR 219.3 million to EUR 210.8 million in 2016. Decrease in net book value was mainly due to annual amortisations and depreciation (EUR

7.6 million) and impairment loss (EUR 3.6 million). Business combinations and other investments increased the net book value by EUR 4.8 million. Exchange differences decreased the net book value by EUR 3.2 million.

5. IMPAIRMENT TESTING OF GOODWILL AND OTHER INTANGIBLE ASSETS WITH INDEFINITE USEFUL LIVES

The allocation of goodwill and other intangible assets with indefinite useful lives

Goodwill and other intangible assets with indefinite useful lives acquired through business combinations have been allocated to cash-generating units for impairment testing. A CGU encompasses the business operations of the segment in each country, except for Central Europe, Latvia and

Lithuania, and Czech and Slovakia. Central Europe consists of business in Germany, Austria and Hungary. The Cramo brand has been considered as a corporate-level asset which is annually allocated to CGUs for impairment on the basis of CGU sales. Sales is believed to best reflect the future cash inflows the brand generates. Russian operations have been treated as assets to be transferred to joint venture.

Goodwill and the Cramo brand have been allocated to CGUs as follows:

EUR 1,000	2016		2015	
	Goodwill	Cramo brand	Goodwill	Cramo brand
Finland	31,500	5,347	31,123	4,892
Sweden	85,101	14,715	88,462	14,607
Norway	16,426	2,787	15,542	3,105
Denmark				1,246
Central Europe		3,249		3,407
Estonia	11,806	726	11,806	703
Latvia and Lithuania			948	697
Poland	3,152	432	3,261	494
The Czech Republic and Slovakia		351		349
Total	147,985	27,608	151,142	29,500

Basis for impairment testing

Goodwill is tested for impairment annually, or on a more frequent basis should there be an indication of a potential impairment. The latest impairment test has been performed in December 2016. The test was based on the balance sheet as at 31 October 2016. In impairment testing the assets of a CGU are compared to its recoverable amount. The recoverable amount of a CGU has been determined based on value in use which is calculated by using the discounted cash flow method. The cash flow projections used in the calculations are based on the next year's financial budget and the forecasts for the subsequent four years approved by management. The cash flow projections, covering all together a period of five years, are based on experience as well as on the estimated future development of the markets. The projections are in line with the external information to the extent such projections are available. Management has approved the plans upon which the impairment tests are based.

Impairment loss in 2016

As a result of the impairment test performed in December 2016, a total amount of EUR 8.0 million was recognised as impairment loss for the accounting period 2016. The impairment loss was attributable to cash CGUs Denmark (EUR 5.0 million) and Latvia and Lithuania (EUR 3.0 million). The impairment loss of was recorded against Cramo brand (EUR 1.9 million), against goodwill (EUR 0.9 million), against depot network (EUR 0.3 million), against other tangible assets (EUR 0.4 million) and against tangible assets (EUR 4.4 million). In Denmark the impairment loss is attributable to low profitability in equipment rental business. In Latvia and Lithuania the impairment loss is attributable to Latvian business.

The key assumptions related to impairment test of 2016 and 2015 is presented in the tables below.

Key assumptions used in value-in-use calculations:

2016	EBITA-%	Compound annual growth rate five-year period, %	Growth rate beyond the five-year period, %	Discount rate before tax, %	Discount rate after tax, %
Finland	19.3–22.5	0.7	1.0	7.29	5.99
Sweden	17.3–20.7	0.2	1.0	7.27	5.82
Norway	7.8–10.9	2.2	1.0	8.17	6.38
Denmark	10.7–12.0	0.8	1.0	8.00	6.42
Central Europe	7.3–10.7	2.6	1.0	8.37	6.18
Eastern Europe	5.5–19.5	1.6–2.9	1.5	8.29–9.05	6.89–7.85

2015	EBITA-%	Compound annual growth rate five-year period, %	Growth rate beyond the five-year period, %	Discount rate before tax, %	Discount rate after tax, %
Finland	18.9–22.8	1.3	1.0	6.98	5.81
Sweden	17.3–19.4	0.8	1.0	7.12	5.79
Norway	7.6–11.8	1.7	1.0	7.99	6.18
Denmark	9.8–11.0	2.0	1.0	7.90	6.37
Central Europe	0.2–9.7	4.0	1.0	8.01	6.15
Eastern Europe	13.6–20.1	0.6–3.3	1.5	7.42–8.90	6.26–7.45

EBITA margin

The Group's profitability improved in 2016. Differences in performance between cash generating units were significant. The efficiency improvements are expected to gradually improve the profitability in majority of the CGUs during the forecasting period. Profitability level used in terminal value calculation reflects mostly moderate historical level.

Growth rate for the five year period

Future growth estimates are mainly based on higher utilisation rates but also on improved pricing some areas. Growth investments and their impact have been carved out. Sales is expected to reach an annual average growth rate of 0.2 - 2.9 per cent in 2017-2021. In the Nordic countries the annual average growth rate is expected to vary between 0.2 - 2.2 per cent, depending on the unit. In Central Europe the growth in sales is expected to grow annually an average rate of 2.6 percent in 2017-2021. In Eastern-Europe, the annual average growth rate is expected to be 1.6 - 2.9 per cent.

Growth rate beyond the five years

The growth rate beyond five years for Eastern Europe countries equals 1.5 percent per year and for the Nordic and Central Europe businesses equals one percent per year. This is predicted to reflect a moderate long-term inflation forecast.

Discount rate

Forecasted cash flows are discounted to present value with CGU specific discount rate. Cramo Group's weighted average cost of capital (WACC) constitutes the basis for the determination of the discount rate. Cost of capital includes assumptions for capital structure, risk-free interest rate, risk premium, cost of debt and equity and equity beta. In determining the CGU-specific discount rates the weighted average cost of capital is increased by a CGU specific risk factor, which includes assumptions for country, currency and price risks inherent to CGU.

Sensitivity analysis of the main assumptions

The figures below represent the maximum changes of the main assumptions, for each assumption separately, after which the carrying amount of the unit equals its recoverable amount. In the sensitivity analysis, each parameter was varied independently whilst holding the other parameters constant.

	Change in EBITA margin Max. decrease in %-units	Compound annual growth rate, five- year period Max. decrease in %-units	Growth rate beyond five-year period Max. decrease in %-units	Discount rate Max. increase in %-units	The amount by which the recoverable amount exceeds the carrying amount, EUR million	The amount by which the recoverable amount exceeds the carrying amount, %-range

6. BUSINESS COMBINATIONS

2016

Cramo made one business combination during 2016. On 1 April 2016 Cramo acquired logistics and telescopic handler company Kurrottaja- ja Kuljetuspalvelu Parviainen Oy's business.

Established in 2004, Kurrottaja- ja Kuljetuspalvelu Parviainen Oy is the largest private company in Finland providing telehandler services. Parviainen operates mainly in Southern Finland. The sales of the company were approximately EUR 3 million in 2015. All 23 employees of Parviainen were transferred to the service of Cramo as existing employees.

The Group sales would have increased by EUR 0.8 million and EBITA would have been the same, if the acquisition had been completed on 1 January 2016.

The total consideration for transaction includes a EUR 0.6 million contingent consideration, which is paid based on the financial development after the consolidation date. A contingent consideration liability relating to acquisitions prior to 2016 totalling EUR 0.6 million was paid in 2016. The remaining contingent consideration for acquisitions at the balance sheet date is EUR 1.1 million.

2015

The information of the business combinations have been presented as combined, since none of them is material when assessed separately. Individual considerations have not been presented separately, since none of them is material, when assessed individually.

Cramo acquired on 4 February 2015 the shares of Vuokra-Pekat Oy. Vuokra-Pekat, founded in 2004, is a strong local general rental company in Southern Finland. The company's specific area of expertise is rental-related dust control, in which area it is also the market leader in Finland. The dust control service is an excellent complement to Cramo's range of rental-related services throughout the country. The company's sales were approximately EUR 4.8 million in 2014, profitability is at a good level and the company employs 20 persons.

On 13 February 2015 Cramo announced that it strengthens its position on the island of Gotland in Sweden by acquiring all the assets of Visby Hyresmaskiner AB ("VHM") and at the same time converting VHM into

a Cramo franchisee. VHM's sales in 2013 were approximately EUR 2.3 million. VHM, founded in 1998 and located in central Visby, has a strong position in the local rental market. The company provides a wide range of rental equipment for construction companies and contractors all over Gotland.

Cramo acquired on 22 December 2015 MDS Raumsysteme's modular space rental business including 180 modules and related customer contracts. The deal resulted in a EUR 136 thousand negative goodwill, which is recognised as other operating income.

The Group sales would have increased by EUR 0.8 million and EBITA would have been the same, if all the acquisitions had been completed on 1 January 2015.

The total consideration for transactions includes a EUR 1.0 million contingent consideration, which is paid mostly based on the financial development after the consolidation date. In 2015 the contingent consideration has been reversed by EUR 0.4 million, thus the remaining liability is EUR 0.6 million. The decrease has been recognised in other operating income. A contingent consideration liability relating to acquisitions prior to 2015 totalling EUR 0.7 million was paid. The remaining contingent consideration for acquisitions made prior to 2015 is EUR 0.5 million.

The table below represents the summary of the business combinations completed in 2015. The acquisition values have been converted to euros by using the exchange rates prevailing at the acquisition date. Exchange differences compared with the balance sheet date's exchange rates are immaterial.

Fortrent is a construction machinery and equipment rental company operating in Russia and Ukraine. The company is owned and controlled jointly 50/50 by Cramo and Ramirent. Cramo presents its share of profit or loss from the joint venture above EBITDA in the consolidated income statement in accordance with the equity method of accounting.

Cramo and Ramirent have granted loans to the joint venture. The value of the loan at the end of 2016 is 25.9 million. In 2016 Fortrent has amortised the loans by EUR 4.7 (4.8) million.

Also in the fourth quarter due to the reclassification of loans Fortrent books part of the exchange rate difference of loans to the income statement instead of equity (net investment). Due to the change Fortrent's full year net result increased by EUR 1.0 million.

The Group has also a 50 per cent share in a joint venture Fellesutleie AS. The company operates in machinery rental in Norway. Cramo presents its share of profit of the joint venture using the equity method of accounting above EBITDA.

The deferred tax liability for the annual profits of the Estonian subsidiary has been recognised since the financial year 2013 corresponding to the half of the profit in line with the dividend distribution policy for future earnings. No deferred tax liability has been recognised on the undistributed earnings of the earlier years, because the distribution is in the control of the Group and such distribution is not probable within foreseeable future.

Deferred tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the related tax benefit through future taxable

profits is probable. The Group had not recognised deferred tax assets of EUR 11,559 (13,551) thousand of the tax losses in respect of subsidiaries that are currently making a loss.

Specification of tax items recognised in other comprehensive income is presented in note 26.

Derivative financial instruments

The fair value of forward contracts is determined by using the forward rates of 31 December for respective contracts. For interest rate swaps the fair value is computed by discounting the future cash flows using the market rates at annual closing. If the market value given by a counterparty is utilised, company produces also its own calculation using generally accepted valuation methods.

Interest-bearing receivables and liabilities

The fair value of loans and loans receivable is based on the discounted cash flows. The rate used for measurement is the rate which would apply for the Group's new external financing and investments. The overall rate consists of a risk free rate and the risk premium for the company. The fair value of leasing contracts is computed by discounting the cash flows with a rate corresponding to similar contracts.

Trade and other receivables and liabilities

The fair value of trade and other receivables and liabilities corresponds to the historical cost. The effect of discounting is not relevant due to short maturity of the instrument.

Fair value hierarchy disclosures for each class of financial instruments:

The following fair value measurement hierarchy is applied for the financial instruments measured in the balance sheet at fair value.

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

10. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and cash flow interest rate risk), credit risk and liquidity risk. The objective of the Group's risk management is to minimise the negative effects on the Group's financial performance caused by changes in financial markets. The Group uses derivative financial instruments to hedge certain risk exposures.

Risk management is carried out by a central treasury function (Group Treasury). Group Treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units according to the Treasury policy approved by the Board. The objectives of Group Treasury are to secure sufficient funding for business operations, avoiding financial constraints at all times, to provide business units with financial services, to minimise the costs of financing, to manage financial risks (currency, interest rate, liquidity and funding, credit and operational risks) and to provide the management with information on the financial position and risk exposures of Cramo and its business units. In addition, Group Treasury actively monitors the actual values of the Group's financial covenants and anticipated financial headroom in relation to maximum values of these financial covenants as part of the Group's business planning.

MARKET RISK

Interest rate risk

Fluctuations in market interest rates have an effect on consolidated interest outflows and the fair value of interest-bearing receivables, loans payable and derivative instruments. The objective of interest rate risk management is to mitigate the impact of interest rate changes on the income statement, balance sheet and cash flow, while also taking into account the market value of net debt.

The Group's interest rate risk arises mainly from its long-term borrowings. The Group is mainly exposed to cash flow risk, which arises from liabilities at variable rates and is partly off-set by the bonds with fixed interest rate. At the balance sheet date, 75.2% (62.4%) of outstanding interest-bearing liabilities were at fixed interest rates when including the effect of derivatives used. During 2016 and 2015 the Group's borrowings were denominated mainly in the EUR. The currency specification of financial lease liabilities is presented in table later in this note. The weighted average interest rate fixing period for loan portfolio was 3.8 (3.0 years). The Treasury Policy states the limit for the portion of fixed interest to be 20–80% of the whole loan portfolio and duration to stay in a range from one to four years.

The Group manages its interest rate related cash flow risk by using interest rate swaps in accordance with the Treasury Policy. Such interest rate swaps have the economic effect of converting borrowings from floating rates to fixed rates. The nominal value of the Group's interest rate swaps was at 31 December 2016 EUR 130.0 (130.0) million. IAS 39 hedge accounting was applied to all of these interest rate swaps. The maturity structure of these derivatives is presented in a table following in this note.

For interest rate sensitivity analysis in accordance with IFRS 7, if interest rates at 31 December 2016 on EUR-denominated borrowings had been 1 % higher/lower with all other variables held constant, the impact to pre-tax profit for the year would have been EUR -0.7/-0.9 (-1.3/-0.5) million, as a result of changes in the interest flows on floating rate borrowings and hedging instruments. The impact in other comprehensive income items would have been EUR +5.9/-5.9 (+5.6/-6.0) million, as a result of a change in the fair value of interest rate swaps for which hedge accounting is applied. The following table illustrates the sensitivity analysis.

MEUR	2016				2015			
	Income statement	Other comprehensive income			Income statement	Other comprehensive income		
Effect of change in interest rates	+ 1%	- 1%	+ 1%	- 1%	+ 1%	- 1%	+ 1%	- 1%
Interest-bearing liabilities	-1.7				-2.0	0.2		
Interest rate derivatives, hedge accounted	0.9	-0.9	5.9	-5.9	0.7	-0.7	5.6	-6.0
Total	-0.7	-0.9	5.9	-5.9	-1.3	-0.5	5.6	-6.0

As the Group has no significant interest-bearing assets, the Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group's interest-bearing liabilities and their average interest rates are presented in note 15.

Foreign exchange risk

The Group operates internationally and is exposed to risks arising from foreign exchange rate fluctuations, primarily from exposures with respect to the Swedish krona, Norwegian krone and Danish krone. Foreign exchange risk arises primarily from internal funding and net investments in foreign operations as well as from recognised assets and liabilities.

Foreign exchange risk arising from internal funding and recognised assets and liabilities is managed primarily through forward contracts. A table following in this note presents the maturity structure of these derivatives. Hedge accounting is not applied for these derivatives and changes in the fair value of derivatives are recognised in the income statement.

Sales in Group companies are carried out in the functional currency of the local entities. These transactions do not expose the Group to significant foreign exchange risk. Purchases are carried out both in Euros and local currencies. The currency risk arising from purchases is considered insignificant. Hence, according to the Treasury Policy, future purchase commitments are not hedged.

Sensitivity analysis, in accordance with IFRS 7, aims to represent the sensitivity of the consolidated income and equity with respect to foreign exchange rate fluctuations. The open euro exposure against other functional currencies arises from account payables, leasing liabilities in other than local currency, as well as from the open exposure of the Group Treasury.

The following table presents the Group's currency exposure and the sensitivity effects to equity. The sensitivity calculation is based on a change of 10% in the Euro exchange rate against all the functional currencies that the Group operates in.

EUR 1,000 31 Dec 2016	SEK	DKK	NOK	Other currencies total	Total

During 2016 and 2015 Cramo has not utilised any financial instruments to hedge the net investments in subsidiaries denominated in other currencies than EUR.

In 2016 the translation differences arising from subsidiaries' equities denominated in Swedish krona amounted to EUR -14.7 (7.7) million, in

Danish krone EUR -0.0 (-0.0) million, in Norwegian krone EUR -1.6 (-1.7) million and other currencies EUR -0.5 (0.9) million. In addition to these, translation differences derived from a joint venture Fortrent amounted to EUR 3.3 (-2.0) million. The cumulative total of translation differences shown in other comprehensive income items totalled to EUR -36.7 (-26.4) million.

FX forward contracts	116,225	106,904
Interest rate swaps	130,000	130,000
Total	246,225	236,904

The derivatives used in 2016 and 2015 were currency forward contracts and interest rate swaps. These were used for hedging purposes in line with the Group's hedging policy.

The change in fair value of currency derivatives has been recognised in the income statement. The change in fair value of hedge accounted interest rate derivatives has been recognised in other comprehensive income items, as net of tax. On 31 December 2016 the open derivative exposure reflected well the exposure retained during the financial year.

Cramo enters into derivative transactions under master netting agreements. In general the amounts owed by each counterparty are settled with one single net payment by each currency. In certain circumstances, e.g. when a credit event such as a default occurs, all outstanding transactions under the agreements are terminated and only one amount is payable in settlement of all transactions. The netting agreements do not meet the criteria for offsetting in the balance sheet. The following table illustrates the carrying amounts of derivative instruments that are subject to the agreements described above.

EUR 1,000 Derivative financial assets	2016	2015

CREDIT RISK

The Group's policy identifies counterparty credit rating requirements and principles of investment for clients, investment transactions and derivative financial instruments. The Group has no significant credit risk concentrations since it has a broad clientele, which is geographically spread over a wide area. Credits are granted to companies and private persons, which have proper credit information. The Group's maximum exposure to credit risk is represented by the fair values of receivables and other financial assets at 31 December 2016.

The maturity structure of accounts receivables is presented in note 11.

Also the credit losses and increase of provision for bad debts are presented in note 11. Receivables do not include significant credit risk concentrations

REFUNDING AND LIQUIDITY RISK

The Group Treasury manages the Group's liquidity risk and ensures flexibility in funding by maintaining availability under committed credit lines. The Group uses diverse funding sources and borrowings are primarily long-term. The Group has committed borrowing facilities or other lines of credit that it can access to meet liquidity needs. At 31 December 2016 the undrawn committed credit facilities totalling EUR 206.1 (201.2) million, of which long-term EUR 190.0 (185.0) million and short-term EUR 16.1 (16.2) million.

In order to decrease the refinancing risk the Group aims to diversify the maturity structure of its interest-bearing debt and negotiates new committed credit lines well in advance of need. In November 2016 Cramo issued a senior unsecured bond of EUR 150 million. The bond matures on 28.2.2022, carrying a fixed annual interest at the rate of 2.375 %. Simultaneously with the new issue Cramo made a voluntary tender offer for the notes of the EUR 100 million bond due in February 2018. Tender offer resulted a take-up totalling EUR 83,7 million and Cramo purchasing these notes in cash. Notes not tendered, totalling to EUR 16.3 million, will remain outstanding and due on February 2018.

The table below analyses the Group's non-derivative financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. Derivative instruments are included in the analysis if their contractual maturities are essential for an understanding of the timing of the cash flows. The amounts disclosed in the table are the contractual undiscounted cash flows.

CAPITAL STRUCTURE

The Group's objectives when managing capital structure are to safeguard the Group's ability to continue as a going concern and to maintain the optimum capital structure. The targets for capital structure are determined by the Board of Directors. The Group Treasury regularly monitors the development of the capital structure.

The Group monitors capital on the basis of the gearing ratio. Gearing is calculated as the ratio of net interest-bearing liability to total equity. One of the financial targets of the Group is to keep the gearing ratio below 100%. This target was well met (gearing at 31 Dec 2016 74.5%, 31 Dec 2015 75.1%).

The net interest-bearing liabilities of the Group at 31 December 2016 totalled EUR 387.0 million, while at 31 December 2015 they were EUR 368.4 million. During 2016 the net interest-bearing liabilities increased by EUR 18.6 million.

Net debt and gearing are represented in the table below.

EUR 1,000	2016	2015
Interest-bearing liabilities	396,103	371,908
Cash and cash equivalents	9,099	-3,511
Net interest-bearing liabilities	387,004	368,397
Total equity	519,671	490,743
Gearing, %	74.5	75.1

11. NON-CURRENT AND CURRENT RECEIVABLES

EUR 1,000	2016	2015
Non-current receivables		
Loan receivables from joint ventures (see note 30)	12,926	15,267
Pension assets (see note 16)	47	33
Other receivables ¹	1,301	1,403
Non-current receivables, total	14,274	16,703
Current receivables		
Trade receivables	116,937	104,027
Other receivables	3,410	4,905
Prepaid expenses and accrued income	15,905	21,550
Current receivables, total	136,252	130,482

¹ Available-for-sale financial assets have been reclassified as financial assets to be measured at historical cost due to their immaterial nature for the Group and are presented as other non-current receivables. The comparative figure for other non-current receivables has therefore increased by EUR 187 thousand.

Trade receivables are non-interest-bearing and are generally on 14–60 day terms.

A total amount of EUR 2.255 (3.485) thousands of trade receivables has been recognised in the income statement as impairment losses. See below

for the movements in the provision for impairment of receivables. For further guidance, see credit risk note 10.

EUR 1,000	2016	2015
Movements in the provision for impairment of receivables		
At 1 Jan	5,576	6,130
Exchange differences	-3	-19
Charge for the period (+)/income (-)	-740	-535
At 31 Dec	4,833	5,576

The balance sheet values best correspond to the amount which is the maximum credit risk exposure before deducting the fair value of collateral in case other contractual parties fail to meet their obligations related to the financial instruments. The manner in which the Group operates does not require the obtaining of collateral in respect of trade and other receivables. Trade and other receivables do not contain any significant concentration of

credit risk. The management considers that the carrying amount of trade and other receivables approximates their fair value.

Material items included in prepaid expenses and accrued income relate to un invoiced revenue accrual and prepaid premises, insurance, personnel and leasing expenses.

EUR 1,000	2016	2015
Ageing analysis of trade receivables		
Trade receivables, not due at reporting date	98,318	79,601
Trade receivables 1 – 30 days overdue	13,043	18,759
Trade receivables 31 – 60 days overdue	2,916	2,182
Trade receivables 61 – 90 days overdue	309	455
Trade receivables 91 – 180 days overdue	780	1,048
Trade receivables more than 180 days overdue	1,571	1,982
Total	116,937	104,027

EUR 1,000	2016	2015
Trade receivables by currencies		
EUR	31,218	27,640
SEK	61,162	56,811
NOK	11,594	9,985
DKK	9,011	5,588
PLN	1,617	1,729
Other	2,335	2,274
Total	116,937	104,027

Trade receivables are arising from a large number of customers and are mainly denominated in EUR, SEK and NOK, therefore mitigating the concentration of risk.

12. INVENTORIES

EUR 1,000	2016	2015
Materials, supplies and goods for sale	8,817	9,055
Obsolescence allowance	-96	-92
Total	8,721	8,963

At the end of the period, inventories have been written down by EUR 96 (92) thousand to correspond to their net realisable value. The amount of write-down is recognised in materials and services in the income statement.

13. CASH AND CASH EQUIVALENTS

EUR 1,000	2016	2015
Cash in hand and at banks	9,099	3,511
Total	9,099	3,511

Cash and cash equivalents include cash in hand and bank deposits available at call. Cash and cash equivalents have original maturities of three months or less. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Cash at banks earns interest at floating rates based on daily bank deposit rates.

At 31 December 2016, the Group had available EUR 206.1 (201.2) million of undrawn committed borrowing facilities in respect of which all conditions precedent had been met.

For the purpose of the consolidated cash flow statement, cash and cash equivalents comprise the abovementioned figures for cash in hand and at banks at 31 December 2016 and 31 December 2015.

14. SHARE CAPITAL AND EQUITY FUNDS

EUR 1,000	Number of shares	Share capital	Other reserves	Total
Movements during the year				
At 1 Jan 2015	43,903,554	24,835	322,837	347,672
Exercise of share options	717,740		3,459	3,459
At 31 Dec 2015	44,621,294	24,835	326,297	351,132
Exercise of share options	69,260		602	602
At 31 Dec 2016	44,690,554	24,835	326,899	351,734

During the financial year Cramo Plc had performance shareplans and one Cramo share savings plan in operations. More information on the share-based payments is given in note 29.

Each share entitles the holder to one vote at the Annual General Meeting and to an equal dividend. At the balance sheet date share capital was fully paid and entered in the trade register.

Other reserves

Other reserves include the subscription price of the shares and also the premiums received on exercise of share options and other share issues under the old Limited Liability Companies Act.

EUR 1,000	Hedging fund
Movements during the year	
At 1 Jan 2015	-8,162
Cash flow hedges	
Fair value gains in period	1,281
Tax on fair value gains	-193
At 31 Dec 2015	-7,074
Cash flow hedges	
Fair value gains in period	-1,924
Tax on fair value gains	426
At 31 Dec 2016	-8,572

Hedging fund

The Group applies hedge accounting for all of the interest rate derivatives that are designated as cash flow hedges. The effective portion of changes in the fair value of those derivatives is recognised in hedging fund. The gain or loss relating to the ineffective portion is recognised in the income statement and classified within finance expenses.

Translation differences

Translation differences arise from the consolidation of the financial statements of subsidiaries outside the Euro zone.

At the balance sheet date the Group had not hedged any foreign currency denominated equity.

DIVIDENDS

The Board proposes to the AGM a dividend of EUR 0.75 (0.65) per share for year 2016.

15. INTEREST-BEARING LIABILITIES

EUR 1,000	2016		2015	
	Book value	Fair value	Book value	Fair value
Non-current interest-bearing liabilities				
Syndicated bank loan	183,189	183,189	187,815	187,815
Bond	161,089	163,949	99,769	105,451
Other liabilities	202	202	358	358
Finance lease liabilities	3,378	3,378	5,869	5,869
Total	347,858	350,718	293,811	299,493
Current interest-bearing liabilities	Book value		Book value	
Other liabilities	10,636		10,764	
Finance lease liabilities	2,639		7,873	
Commercial papers	34,970		59,460	
Total	48,245		78,097	
Total interest-bearing liabilities	396,103		371,908	

Book values of current liabilities approximate their fair values. All bank loans are at floating rate and thus their fair values do not differ materially from their carrying amounts.

Other liabilities mainly consist of overdraft limits and hire purchase liabilities.

At the year end the Group had available undrawn committed credit facilities totalling EUR 206.1 (201.2) million, of which long-term EUR 190.0 (185.0) million and short-term EUR 16.1 (16.2) million.

In November 2016 Cramo issued a senior unsecured bond of EUR 150.0 million. The bond matures on 28.2.2022, carrying a fixed annual interest at the rate of 2.375 %. Simultaneously with the new issue Cramo made a voluntary tender offer for the notes of the EUR 100.0 million bond due in February 2018. Tender offer resulted a take-up totalling EUR 83.7 million and Cramo purchasing these notes in cash. Notes not tendered, totalling to EUR 16.3 million, will remain outstanding and due on February 2018.

EUR 1,000	2017	2018	2019	2020	2021	2022+	Total
Interest-bearing liabilities mature as follows, 2016							
Syndicated bank loan				36,638	146,551		183,189

Finance lease liabilities

The Group has entered into financial leases on certain vehicles and items of machinery. These leases have an average life of between three and five years. Financial lease liabilities mainly have floating rates based on

market rates between one and three months. Tables below specify the future minimum cash flows under financial leases by maturity and by currency as at 31 December.

EUR 1,000	2016	2015
Gross finance lease liabilities		
- minimum lease payments		
Payable < 1 year from balance sheet date	2,733	8,006
Payable 1-5 years from balance sheet date	3,544	6,124
Total	6,277	14,130
Future finance charges on finance leases	259	388
Present value of minimum future finance lease payments	6,018	13,742

EUR 1,000	2016	2015
Finance lease liabilities by currency		
SEK	3,132	8,523
NOK	2,080	3,596
EUR	402	962
Other	403	660
Total	6,018	13,742

Weighted average maturity and interest rates at 31 Dec	2016		2015	
	Maturity, years	Interest, %	Maturity, years	Interest, %
Bank loans excluding interest rate swaps	3.8	1.13	4.8	1.27
Bank loans including interest rate swaps	3.8	2.29	4.8	2.09
Bond	4.7	2.58	2.2	4.50
Commercial papers	0.1	0.49	0.1	0.49
Finance leases	1.8	1.55	1.3	1.73
Other liabilities	1.0	0.90	1.0	0.90
Total (including interest rate swaps)	3.8	2.20	3.1	2.43

16. RETIREMENT BENEFIT OBLIGATIONS

Retirement benefit obligations as presented in the balance sheet as follows:

EUR 1,000	2016	2015
Liabilities in the balance sheet		
Defined pension benefits	1,470	1,659
Other long-term employee benefits	140	48
Total	1,610	1,707
Assets in the balance sheet		
Defined pension benefits (see note 11)	47	33
Total	47	33

The Group operates a number of retirement benefit plans in accordance with local conditions and practises in the countries in which it operates. Most of the retirement benefit plans are defined contribution plans. Currently there are two retirement benefit plans in Germany and Sweden that are classified as defined benefit plans.

The pension obligations in Germany are directly at the Group's own responsibility and there are no funded assets. The plan applies to already retired employees.

The defined benefit plan in Sweden applies to retired former employees. The plan is funded.

The amounts recognised in the balance sheet are determined as follows:

EUR 1,000	2016	2015
Present value of funded obligations	1,426	1,380
Fair value of plan assets	-1,379	-1,413
Excess (-) / Deficit (+) of funded plans	47	-33
Present value of unfunded obligations	1,470	1,659
Total deficit of defined benefit plans	1,517	1,627

Defined benefit obligation has changed during the period as follows:

EUR 1,000	2016	2015
Net book value at 1 Jan	3,039	3,094
Exchange differences	-52	30
Benefits paid	-156	-169
Interest cost	71	62
Remeasurements	-6	22
Net book value at 31 Dec	2,897	3,039

Fair value of plan assets has changed during the period as follows:

EUR 1,000	2016	2015
Balance at 1 Jan	1,413	1,276
Exchange differences	-54	28
Benefits paid	-26	-27
Interest income	40	32
Remeasurements	5	103
Balance at 31 Dec	1,379	1,413

Expense in the income statement has been defined as follows:

EUR 1,000	2016	2015
Net interest income (+)/cost (-)	-31	-30
Total	-31	-30

Remeasurements charged (+) or credited (-) to equity in other comprehensive income as follows:

EUR 1,000	2016	2015
Remeasurements:		
Gain (-) / Loss (+) from change in financial assumptions	157	-305
Experience gains (-) / losses (+)	-169	225
Total	-11	-81

The principal assumptions used in determining pension benefit obligations for the Group's plans are shown below:

%	2016	2015
Discount rate	1.47-2.50	2.02-3.00
Expected pension increase rate	2.00	2.00

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions are:	Change in assumption	Effect of increase in assumption on the obligation	Effect of decrease in assumption on the obligation
Discount rate, %	0.50	Decrease by 5.3	Increase by 5.8
Pension growth rate, %	1.00	Increase by 2.9	Decrease by 2.8
Life expectancy	1 year	Increase by 8.1	Decrease by 8.3

Expected maturity analysis of undiscounted pension liabilities:

EUR 1,000 At 31 Dec 2016	Less than a year	Between 1–2 years	Between 2–5 years	Over 5 years	Total
Payments from plans	244	235	649	2,168	3,296

In Sweden the ITP pension plans operated by Alecta are multi-employer benefit plans. It has not been possible to receive sufficient information for the calculation of obligation and assets by employer from Alecta and due to that the plan has been treated as a defined contribution plan in the

financial statements. In addition, the Group has defined benefit plans in Norway which are not significant and those plans are treated as defined contribution plans.

17. OTHER NON-CURRENT LIABILITIES

EUR 1,000	2016	2015
Advances received	112	273
Other non-current liabilities ¹	2,710	2,559
Total	2,822	2,832

¹ Other non-current liabilities mainly consist of the cash component of the performance share plan program and unpaid contingent considerations of business acquisitions.

18. TRADE AND OTHER PAYABLES

EUR 1,000	2016	2015
Trade payables	69,930	63,432
Advances received	14,943	12,607
Accrued expenses and deferred income	46,977	47,310
Other current liabilities	16,356	12,721
Total	148,205	136,070

Material items included in accrued expenses and deferred income consist of personnel expenses and periodised customer bonuses.

The management considers that the carrying amount of trade and other liabilities approximates their fair value.

Terms and conditions of the above liabilities:

- Trade payables are non-interest bearing and are normally settled on 14-60 day terms
- Other current liabilities are non-interest bearing and have an average term of three months

19. COLLATERALS AND CONTINGENT LIABILITIES

EUR 1,000	2016	2015
Collateral given on own behalf		
Debts, secured by collateral		
Finance lease liabilities	6,018	13,741
Collateral given		
Pledges, finance lease	15,166	34,983
Other contingent liabilities		
Investments	53,874	24,995
Other contingent liabilities	1,344	1,182
Group's share of commitments in joint ventures	90	65

Joint venture contingent liabilities see note 7.

EUR 1,000	2016	2015
Commitments to office and depot rents		
Payable < 1 year from balance sheet date	29,434	29,284
Payable 1–5 years from balance sheet date	59,575	55,919
Payable > 5 years from balance sheet date	9,665	4,903
Total	98,674	90,106

EUR 1,000	2016	2015
Operational lease payments		
Payable < 1 year from balance sheet date	10,394	10,335
Payable 1–5 years from balance sheet date	10,259	12,795
Total	20,653	23,130

The Group has entered into commercial leases on rental machinery and vehicles. The maximum maturity of operational lease payments is five years.

20. OTHER OPERATING INCOME

EUR 1,000	2016	2015
Net capital gain on sale of tangible assets	14,704	9,309
Reversal of contingent considerations		396
Rent on premises	676	752
Income from insurance companies	427	480
Other income	1,591	2,526
Total	17,398	13,462

22. EMPLOYEE BENEFIT EXPENSES

EUR 1,000	2016	2015
Salaries and fees	-115,694	-107,084
Termination benefits	-431	-1,510
Share-based payments ¹	-2,202	-1,969
Social security costs	-26,005	-23,580
Pension costs - defined contribution plans	-11,498	-9,755
Total	-155,831	-143,899

¹ In 2016 share-based payments include EUR 261 (255) thousand of termination benefits, which are presented in the note as termination benefits.

23. OTHER OPERATING EXPENSES

EUR 1,000	2016	2015
Rent for premises	-31,324	-31,412
Other expenses for premises	-12,470	-11,973

21. MATERIALS AND SERVICES

EUR 1,000	2016	2015
Cost of sub-rental and rental-sharing	-32,284	-35,427
Cost of goods sold	-25,154	-29,813
Repair and maintenance cost	-51,967	-50,784
Transportation cost	-55,283	-53,082
Cost of external services	-74,714	-67,513
Total	-239,402	-236,619

	2016	2015
Average number of personnel	2,550	2,486
Average number of personnel in joint ventures	331	347

The employee benefits of the Group's management are disclosed in note 30 and information concerning share based payments are presented in note 29. Joint ventures, see note 7.

24. DEPRECIATION AND IMPAIRMENT

EUR 1,000	2016	2015
Depreciation of tangible assets	-102,695	-96,973
Amortisation of intangible assets	-2,703	-2,475
Total depreciation	-105,397	-99,448
Impairment loss of tangible assets	-6,145	-1,430
Impairment loss of intangible assets	-419	
Depreciation and impairment loss related to tangible and intangible assets	-111,962	-100,878
Amortisation on intangible assets resulting from acquisitions	-4,867	-8,114
Impairment loss related to intangible assets resulting from acquisitions	-3,167	
Amortisation and impairment loss resulting from acquisitions	-8,034	-8,114
Total depreciation, amortisation and impairment losses	-119,995	-108,991
Depreciation of tangible assets	-102,695	-96,973
Amortisation of intangible assets	-2,703	-2,475
Amortisation of intangible assets resulting from acquisitions	-4,867	-8,114
Total depreciation and amortisation	-110,264	-107,562
Impairment loss of tangible assets	-6,145	-1,430
Impairment loss of intangible assets	-419	
Impairment loss related to intangible assets resulting from acquisitions	-3,167	
Total impairment losses	-9,731	-1,430
Total depreciation, amortisation and impairment losses	-119,995	-108,991

In 2016 an impairment loss of EUR 3.6 million was recognised on goodwill and intangible assets related to Eastern Europe and Denmark. In 2015 no impairment losses were recognised on goodwill and intangible assets.

Additionally, EUR 4.4 [0,0] million impairment loss on tangible assets was recognized in 2016 relating to business operations of Eastern Europe and Denmark.

See note 5 Impairment testing of goodwill and other intangible for further detail.

25. FINANCIAL INCOME AND EXPENSES

EUR 1,000	2016	2015
Interest income on loans receivable and cash and cash equivalents	878	990
Exchange rate gains, non-hedge accounted derivatives	2,851	8,525
Other exchange rate gains	6,055	1,518
Other financing income		5
Incomes total	9,784	11,038
Interest expenses on financial liabilities measured at amortised cost	-7,658	-8,050
Interest expenses on financial leases	-162	-510
Net interest expenses on interest rate derivatives, cash flow hedges	-2,937	-3,030
Exchange rate losses, non-hedge accounted derivatives	-5,651	-5,826
Other exchange rate losses	-3,533	-4,881
Arrangement and commitment fees relating to interest-bearing loans	-1,517	-1,565
Other financing expenses	-177	-99
Expenses total	-21,633	-23,961
Net financial incomes and expenses	-11,849	-12,923

In accordance with the Treasury Policy, the Group uses interest rate swaps as hedging instruments designated as cash flow hedges. All terms of these hedges match with the terms of the hedged instrument (loan). Hedges are effective and therefore no gains or losses arising from ineffectiveness have been recognised in net finance expenses during the period.

26. INCOME TAXES

EUR 1,000	2016	2015
Amounts recognised in income statement		
Current year tax	-11,591	-11,922
Adjustment for prior years	-102	-663
Change in deferred taxes	-6,594	-1,490
Total	-18,287	-14,075

Amounts recognised in other comprehensive income items (OCI)	2016			2015		
	Before tax	Tax effect	Net of tax	Before tax	Tax effect	Net of tax
Remeasurements of defined benefit liability	11	6	5	80	-22	59
Change in hedging fund	-1,924	-426	-1,498	1,281	-193	1,088
Share of OCI of joint ventures	3,348		3,348	-2,040		-2,040
Translation difference transferred to income statement through liquidation	-267		-267			
Change in translation differences	-13,347		-13,347	6,778		6,778
Total	-12,179	-420	-11,759	6,099	-215	5,885

Reconciliation of effective tax rate

The difference between income taxes at the domestic tax rate in Finland 20 % (2015 20 %) and income taxes recognised in the consolidated income statement is reconciled as follows:

EUR 1,000	2016	2015
Profit before tax	86,856	63,791
Tax calculated with domestic corporate tax rate	-17,371	-12,758
Foreign subsidiaries divergent tax rate +/-	-1,226	-734
Tax from the previous financial periods	-102	-663
Change in tax rates	33	85
Non-taxable income	163	134
Non-deductible expenses	-1,441	-525
Share of result of joint ventures reported net of taxes	266	79
Tax losses for which no deferred income tax asset was recognised	-17	-1,688
Utilisation of previously unrecognised tax losses	453	639
Recognition of previously unrecognised tax losses	1,034	1,474
Other items	-79	-118
Taxes in income statement	-18,287	-14,075
Group's effective tax rate, %	21.1	22.1

Deferred taxes have been recalculated due to the following changes in tax rates:
2016: Slovakia from 23% to 21% (2015: Norway from 27% to 25%)

27. EARNINGS PER SHARE

	2016	2015
Profit for the year attributable to owners of the parent company , EUR 1,000	68,569	49,715
Number of shares		
Basic weighted average number of shares outstanding	44,444,804	44,067,946
Effect of options and share plans granted	231,057	193,064
Diluted weighted average number of shares outstanding	44,675,861	44,261,010
Earnings per share from profit attributable to owners of the parent company		
Basic, EUR	1.54	1.13
Diluted, EUR	1.53	1.12

Basic earnings per share are calculated by dividing the net profit attributable to the owners of the parent company by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by adjusting the weighted average number of all shares to assume conversion of all potentially dilutive shares.

29. SHARE-BASED PAYMENTS

During the financial year the Group had performance share plans and One Cramo share savings plans in operation. The last stock option plan, Stock Options 2011 expired on 31 December 2015. The Group has two performance share plans, established as part of the incentive and commitment program for the key personnel of the Group. The plan established in 2012 covers three discretionary periods 2012, 2013 and 2014 and the plan established in 2015 covers three discretionary periods 2015, 2016 and 2017. One Cramo share plans have been established to encourage Cramo employees to become shareholders in the company. The fifth plan period 2015-2016 was started 1 October 2016.

Effect of Share Plans on the result and financial position

EUR 1,000	
Expenses for the financial period, share-based payments	2,463
Expenses for the financial period, share-based payments, equity-settled	1,002
Liabilities arising from share-based payments on 31 Dec 2016	2,407

The Group has share plans with a dilutive effect, which increases the number of shares. The Group also operated stock option plans until the end of 2015, when the last stock option plan expired. Stock options have a dilutive effect when their exercise price is lower than the fair value of the share. For stock options the dilutive effect is the number of shares which has to be issued without consideration. With the proceeds from the exercise of stock options the Group could not issue the same number of shares at fair value. The fair value of the share is based on the average share price during the period.

28. OTHER NON-CASH CORRECTIONS

EUR 1,000	2016	2015
Net capital gain on sale of tangible assets	-14,704	-9,309
Share-based payments	1,002	826

Weighted average share price, € ²	17.08	
31 Dec 2015		
Outstanding at the end of the period	-	
Exercisable at the end of the period	-	

1 Exercise price in the beginning of the period is status at Dec. 31, 2014. Exercise price for the options forfeited during the period is based on the status at Dec. 31, 2015. Exercise price for the options exercised during the period is based on the realised exercise price.

2 Weighted average price for the company share during the reporting period or partial instrument term within

PERFORMANCE SHARE PLAN

The Group has two performance share plans. The plan established in 2012 covers three discretionary periods 2012, 2013 and 2014 and the plan established in 2015 covers three discretionary periods 2015, 2016 and 2017. The plans were established as part of the incentive and commitment program for the key personnel of the company and its subsidiaries. They offer the target group the opportunity to earn the company shares as a reward on the basis of achievement of targets established for the performance criteria.

There shall be a maximum total of 2,000,000 shares that shall be given as reward on the basis of the two plans covering years 2012-2017 including

a cash proportion needed for taxes and tax-related costs arising from the reward to the key employees on the book-entry registration date of the shares. The rewards shall be paid to the key employees approximately two years after the confirmation of the reward. The rewards of the discretionary period 2013 were paid in January 2016.

The key data and changes in the amounts of share ownership plans are presented in the tables below. Since the cash component of the share reward is also recognised as a share-based expense, the amounts below are presented in gross terms, i.e. the share reward figures include both the reward paid in shares and a number of shares corresponding to the amount of the reward paid in cash.

Performance share plan Basic information	Discretionary Period 2013	Discretionary Period 2014	Discretionary Period 2015	Discretionary Period 2016

Determination of fair value

Inputs to the fair value determination of the share plans granted during the financial year 2016 are listed in the table on the right. The fair value of the equity-settled payment has been determined at grant date and the fair value is expensed during the vesting period. The fair value of the cash-settled payment is revalued on each reporting date and expensed during the vesting period. The total fair value of the rewards is based on the achievement of 80 % of the target and the company's estimate on December 31, 2016 as to the number of shares to be eventually vesting.

Performance share plan Valuation parameters	Discretionary Period 2016
Share price at grant date, €	18.61

Fair value of the cash-settled component per share on 31 Dec 2015, €	23.79
Total fair value on 31 Dec 2015, € thousands	3,642

ONE CRAMO SHARE PLAN

One Cramo share plans have been established to encourage all Cramo employees to become shareholders in the company and reward the employees for their efforts in working towards Cramo's goals. Another objective is to strengthen the tie between Cramo shareholders and employees. The fifth One Cramo plan period 2016-2017 was started 1 October 2016.

During the plan periods the participants can save 2-5% of their monthly gross salary. The total amount of all savings from each plan period may not exceed EUR 4 million. The savings are automatically used to purchase Cramo shares for the participants quarterly, after the publication date of the interim results during the plan period, at market price. The participant will receive one free matching share for every two acquired savings shares, if the participant holds the acquired shares until the end of the designated

holding period. An additional requirement for receiving the matching shares is that the participant's employment has not been terminated before the end of the designated holding period. The matching shares will be paid partly in company shares and partly in cash. The cash part is intended to cover the tax and other tax-related costs arising from the reward to the participant.

The first plan period 2012-2013 ended on 30 September 2013 and related additional shares have been conveyed in May 2016. The second plan period 2013-2014 ended on 30 September 2014 and related additional shares will be conveyed in May 2017.

In accordance with IFRS 2 the matching shares that are equity-settled are valued at the date of acquisition of the savings shares. The cash-settled part of the reward will be evaluated to the fair value at each reporting date. The expenses of the plans are recognised on the vesting-periods ending approximately after 3 years from the grant date.

The key data and changes in the amounts of share ownership plans are presented in the tables below.

30. RELATED PARTY TRANSACTIONS

The Group's related parties include the Board of Directors, Group management team (key management personnel), his/her close family members, entities under control or significant influence of the persons belonging to related parties, subsidiaries and joint ventures. The subsidiaries are listed in note 31 Group companies and Joint ventures in note 7.

The related party transactions disclosed consist of transactions carried out with related parties that are not eliminated in the consolidated financial statements.

On 1 January 2016 Leif Gustafsson took up the position of President and CEO following the retirement of Vesa Koivula.

According to Employees' Pensions Act (TyEL 395/2006), pension costs of EUR 194.4 (95.7) thousand were recognised based on the compensation to the President and CEO. TyEL pension system is part of the Finnish social security system. It is a collective arrangement, in which the employer has no direct responsibility for the pension, but the responsibility lies on the pension system. Arrangements for the financing of pensions are done in two different ways: part of the pensions paid in future is funded in advance, and part funded by the so-called distribution system only when the pensions are paid.

The retirement age for the President and CEO is agreed to be 65 years. In addition to the statutory pension system, Cramo offers a voluntary pension insurance for the President and CEO and one of the Group management team members. The notice period of the President and CEO's service contract is 6 months, during which time he receives a full salary. In case that the contract is terminated by the employer, there may also be a severance payment of 12 months' salary.

Presentation of salaries and bonuses in related party transactions has been changed into accrual bases. As a result, total amount of compensation to President and CEO and other Group management has increased by EUR 351 thousand. Post-employment benefits include voluntary pension systems, which are defined contribution plans.

The value of share-based payments represents the IFRS 2 expense of the share plans granted to the President and CEO and other Group management. The share-based payments are presented in note 29.

The discretionary periods of the share-based incentive scheme for Cramo Plc's key employees are the calendar years starting from 2012. The rewards for 2013 were paid on January 15, 2016 (for 2012 on January 8, 2015). A total of 13,605 (8,344) shares were given in a directed share issue to the President and CEO and other Group management. In addition to which, rewards were paid in cash in the amount of EUR 268.3 (107.7) thousand.

The plan periods of the share-based One Cramo scheme for Cramo Plc's all employees started in 2012. The matching shares were for 2012-2013 plan were paid in May 16, 2016. A total of 462 shares were given in a directed share issue to the Group management. In addition to which, rewards were paid in cash in the amount of EUR 9.8 thousand.

Under the option programme 2011 the President and CEO and other Group management subscribed for 3,910 new shares and sold 293,540 options in 2015.

32. EVENTS AFTER BALANCE SHEET DATE

The Shareholders' Nomination Committee of Cramo Plc proposed 2 February 2017 to the next Annual General Meeting of Shareholders, which is planned to be held on 30 March 2017, that the number of members of the Board of Directors be confirmed as seven (7) ordinary members. The Nomination Committee proposed that, in accordance with their consents, the following current members of the Board be re-elected: Perttu Louhivuoto, Peter Nilsson, Joakim Rubin, Raimo Seppänen, Erkki Stenberg and Caroline Sundewall, and that Veli-Matti Reinikkala be elected as new Board member, all to serve for a term ending at the end of the Annual General Meeting 2018.

The current Chairman of the Board of Directors Helene Biström has announced that she will not be available for re-election. While preparing the proposal for the composition of the Board of Directors, the Nomination Committee has specifically sought to identify a new Chairman of the Board of Directors.

Based on the Nomination Committee's survey, discussions with the Chairman of the Board of Directors and the CEO of the Group,

reports of an independent recruiting consultancy as well as the Board self-evaluation and evaluation process conducted by an independent consultant, the Nomination Committee has decided to propose Veli-Matti Reinikkala to be elected as a member of the Board of Directors. Further, the Nomination Committee recommends that the Board of Directors elect Veli-Matti Reinikkala as the Chairman of the Board of Directors.

Veli-Matti Reinikkala (born 1957) has held several senior management positions in ABB, including President of Region Europe in 2015 and member of the Group Executive Committee 2006–2015, Head of Process Automation Division 2006–2014, Business Area Manager for ABB Process Automation in 2005 and Automation Technologies Division Manager in China 2003–2004. Reinikkala is currently a member of the board of directors at UPM-Kymmene Corporation (since 2007) and Fortum Corporation (since 2016). He holds an Executive Master of Business Administration from Helsinki School of Economics.

33. CALCULATION OF THE KEY FIGURES AND RATIOS

KEY FIGURES ON FINANCIAL PERFORMANCE:

Return on equity, %

$$= \frac{\text{Profit for the period}}{\text{Total equity (average)}} \times 100$$

Return on investment, %

$$= \frac{\text{Profit before taxes + interest and other financial expenses}}{\text{Balance sheet total - non-interest-bearing liabilities (average)}} \times 100$$

Equity ratio, %

$$= \frac{\text{Total equity}}{\text{Balance sheet total - advance payments received}} \times 100$$

Net interest-bearing liabilities

= Interest-bearing liabilities – cash and cash equivalents

Gearing, %

$$= \frac{\text{Net interest-bearing liabilities}}{\text{Total equity}} \times 100$$

Personnel on average

= The average number of employees at the end of each calendar month during the accounting period, adjusted with the number of part-time employees

THE ALTERNATIVE PERFORMANCE MEASURES:

EBITA

= Operating profit (EBIT) + amortisation and impairment on intangible assets (purchase price allocations) arising from acquisitions

PER-SHARE RATIOS:

Earnings per share (EPS)

$$= \frac{\text{Profit for the year attributable to owners of the parent company}}{\text{Adjusted average number of shares during the period}}$$

Shareholders' equity per share

$$= \frac{\text{Shareholders' equity}}{\text{Adjusted number of shares at the end of the period}}$$

Dividend per share

$$= \frac{\text{Dividend distribution for the period}}{\text{Adjusted number of shares at the end of the period}}$$

Dividend per earnings, %

$$= \frac{\text{Dividend per share}}{\text{Earnings per share}} \times 100$$

Effective dividend yield, %

$$= \frac{\text{Dividend per share}}{\text{Issue-adjusted closing price at the end of the period}} \times 100$$

Price/earnings ratio (P/E)

$$= \frac{\text{Issue-adjusted closing price at the end of the period}}{\text{Earnings per share}}$$

Market capitalisation

= Number of shares at the end of the period x closing price at the end of the period

PARENT COMPANY NOTES TO THE FINANCIAL STATEMENTS (FAS)

1. ACCOUNTING PRINCIPLES

Measurement of tangible assets

Tangible assets are recorded at cost, including fixed manufacturing costs less depreciation according to plan. Maintenance and repair costs are recognised as expenses in the year in which they are incurred.

Depreciation according to plan is calculated, based on Group-wide principles, on a straight-line basis over the expected useful lives of the assets.

Depreciations according to plan are as follows:

Buildings and structures	20 years
Machinery and equipment	3–6 years
Other tangible assets	10 years
Intangible assets	5 years

Items denominated in foreign currencies

Assets and liabilities denominated in currencies other than those of the euro zone are translated into euros at the exchange rates prevailing at the date of the transactions. Exchange gains and losses are recognized through profit and loss.

Appropriations

Received group contributions and the accumulated difference between the depreciation according to plan and in taxation is shown under appropriations.

Deferred taxes

Deferred tax liabilities and assets are not entered into the company's balance sheet. Deferred tax liabilities and assets significant to the company are disclosed in the notes.

Revenue and revenue recognition

Revenue consists of service charges to subsidiaries. Sales are recognised on an accrual basis. In calculating revenue, sales are recorded net of indirect taxes, discounts and rebates.

Other operating income

Other operating income includes, among other things, rental income and contributions received as well as gain/loss from mergers. Other operating income also includes management expenses from share-based payments and the share subscription prices charged from subsidiaries. Other operating income is recognised on an accrual basis.

Pension schemes

Pensions are accounted as expense for the period they incurred. There are no uncovered pension liabilities. The pension scheme is based on pension insurance in compliance with the Employees' Pensions Act and the Employment Pensions Fund. In 2016, the contractual retirement age for the President and CEO was 65 years.

Valuation of financial instruments

Financial instruments are measured according to Accounting Act 5:2§, at the lower of acquisition cost and net realisable value.

Income taxes

Income taxes for the financial year and the previous financial years are recognised through taxes in profit and loss.

1 In 2013, the Tax Administration issued a residual tax decision, total amount of EUR 9.7 million, for Cramo Plc concerning 2009 - 2012. According to the decision, the interest income from Cramo's financing company in Belgium should have been taxed in Finland. Cramo Plc has paid the taxes in Belgium and appealed against the decision. In 2015, the Assessment Adjustment Board changed the tax decision, and the Finnish Tax Administration paid Cramo Plc a EUR 8.3 million tax refund. Cramo Plc has appealed to an Administrative Court in Finland against the approximately one million euro tax penalty associated with the changed tax decision. Cramo Plc has submitted the case to the mutual agreement procedure (the MAP process) between Belgium and Finland, to the extent that Cramo has been subjected to double taxation, pursuant to the changed tax decision.

Financial derivative instruments of parent company which are valid at the closing date, will mature during financial years 2017–2023.

The company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and cash flow interest rate risk), credit risk and liquidity risk. The objective of the company's risk management is to minimise the negative effects on the company's financial performance caused by changes in financial markets and to secure adequate liquidity available. The company uses derivative financial instruments only for hedging purposes; to hedge against currency and interest rate risks. The fair value of derivative financial instruments are presented as off-balance sheet items.

The company's interest rate risk arises mainly from its long-term borrowings. The company is mainly exposed to cash flow interest rate risk, which arises from liabilities at variable rates and is partly off-set by the bonds with fixed interest rate. The company manages its cash flow interest rate risk also by using interest rate swaps. Such interest rate swaps have the economic effect of converting borrowings from floating rates to fixed rates, or vice versa.

The Group operates internationally and is exposed to risks arising from foreign exchange rate fluctuations, primarily from exposures with respect to the Swedish krona. Foreign exchange risk arises primarily from internal funding and net investments in foreign operations as well as from recognised assets and liabilities. During 2016 and 2015 Cramo has not utilised any financial instruments to hedge the net investments in subsidiaries denominated in other currencies than EUR. Foreign exchange risk arising from internal funding and recognised assets and liabilities is managed primarily through forward contracts.

Realised results arising from currency and interest rate derivatives have been recognised in finance items in the income statement. The nominal values and market values of the derivatives are disclosed in the table above. The derivative exposure on 31.12.2016 reflects well the exposure retained during the financial year. Further details about Cramo Group's financial risk management are disclosed in the consolidated financial statements, note 10.

19. DEFERRED TAXES

EUR 1,000	2016	2015
Deferred tax asset on negative depreciation difference	4	4

AUDITOR'S REPORT TO THE ANNUAL GENERAL MEETING OF CRAMO PLC

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

OPINION

We have audited the financial statements of Cramo Plc (business identity code 0196435-4) for the year ended 31 December 2016. The financial statements comprise the consolidated balance sheet, statement of comprehensive income, statement of changes in equity, statement of cash flows and notes, including a summary of significant accounting policies, as well as the parent company's balance sheet, income statement, statement of cash flows and notes.

In our opinion

- the consolidated financial statements give a true and fair view of the group's financial performance, financial position and cash flows in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU
- the financial statements give a true and fair view of the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

BASIS FOR OPINION

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and

appropriate to provide a basis for our opinion.

MATERIALITY

The scope of our audit was influenced by our application of materiality. The materiality is determined based on our professional judgement and is used to determine the nature, timing and extent of our audit procedures and to evaluate the effect of identified misstatements on the financial statements as a whole. The level of materiality we set is based on our assessment of the magnitude of misstatements that, individually or in aggregate, could reasonably be expected to have influence on the economic decisions of the users of the financial statements. We have also taken into account misstatements and/or possible misstatements that in our opinion are material for qualitative reasons for the users of the financial statements.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have also addressed the risk of management override of internal controls. This includes consideration of whether there was evidence of management bias that represented a risk of material misstatement due to fraud.

THE KEY AUDIT MATTER

Tangible Assets
(Notes 1, 3 and 24 to the Consolidated Financial Statements)

- Tangible assets consisting mainly of the equipment and modules for rental business (fleet) comprise approximately 60% of the total assets of the Group.

- The business of the Group is highly dependent on the condition and availability of the fleet.
- There is a risk that the judgements made by the management when evaluating the depreciation periods and around the annual impairment review of the Group's rental fleet are not appropriate and that the carrying values of these assets are misstated.

How the matter was addressed in the audit

- In addition to testing certain key controls over the fleet management, our audit procedures consisted of substantive testing procedures including data analyses.
- In particular, we focused our audit procedures on fleet utilisation, gains and losses on asset disposals, depreciation periods and residual values. Our procedures also included attendance in physical counts of the fleet.
- We considered the management's fleet impairment analysis, assessed and challenged the key judgements and sensitivities and the impact that these have in determining whether an impairment exists.
- In addition, we assessed the appropriateness of the Group's disclosures in respect of tangible assets including fleet.

Impairment of Goodwill and Other Intangible Assets (Notes 1, 4, 5 and 6 to the Consolidated Financial Statements)

- In recent years the Group has expanded its activities through acquisitions. As a result, the Group's assets include a significant amount of goodwill and other acquisition-related intangible assets. At the year-end the Group has €148.0 million in goodwill and €52.8 million in other acquisition-related intangible assets.
- Cramo determines the recoverable amount for each cash-generating

unit based on value in use. These recoverable amounts use discounted future cash flow forecasts in which the management makes judgments over certain key assumptions, for example profitability level, discount rate and long-term growth rate.

- Overall, due to the high level of judgment involved, and the significant carrying amounts involved, valuation of goodwill and other intangible assets is one of the key audit matters.
- Based on impairment testing results Cramo recorded in its consolidated financial statements for 2016 impairments on goodwill and other intangible assets totalling €3.6 million relating to the cash-generating units Denmark and Latvia-Lithuania.
- Our audit procedures included testing of the principles and consistency of the Group's impairment testing model.
- We evaluated and challenged the key assumptions used in respect of profitability levels, discount rates and long-term growth rates.
- We involved KPMG valuation specialists when considering the appropriateness of the used assumptions to external market and industry data and to assess the technical accuracy of the calculations.
- We also assessed whether the methods and the key assumptions used remained appropriate and have been consistently applied year-on-year.
- In addition, we assessed the appropriateness of the Group's disclosures in respect of goodwill, other intangible assets and impairment testing.

*Revenue Recognition
(Notes 1 and 2 to the Consolidated Financial Statements)*

- In the Equipment Rental business of the Group revenues consist of numerous individual rental transactions generated in multiple depos.

- In the Modular Space business there are mainly long-term client contracts, which may include more than one contract phase, and different phases are accounted for under different accounting standard. The appropriate identification of the contract phases, in order to ensure proper timing of revenue recognition, is emphasised.
- The user rights in the main sales IT system of the Group are relatively extensive that increases risk for inappropriate or incorrect transactions.
- We evaluated and tested the internal controls and carried out appropriate substantive testing over the completeness, accuracy and timing of revenue recognised in the consolidated financial statements.
- We read the relevant sale agreements and tested the consistency of the accounting with the terms of sale in the agreements. As part of our year-end audit procedures we assessed the recognition of revenues on accrual basis.
- Our work included consideration and testing of rebates and discount arrangements as well as process for recognising credit notes. We also tested journal entries posted to revenue accounts focusing on unusual or irregular items.
- In addition, we assessed the appropriateness of the Group's disclosures in respect of revenue recognition.

*Shares in Subsidiaries in Parent Company
(Parent Company's Notes 2 and 14 to the Financial Statements)*

- Shares in subsidiaries are a significant balance sheet item in the parent company's separate financial statements.
- Shares in subsidiaries are tested for impairment using the same methods as for goodwill impairment testing. Thus, any indication or need

for impairment of goodwill, other acquisition-related assets or fleet is reflected also in the parent company's balance sheet.

- The parent company recorded an impairment of €31.1 million on shares in subsidiaries in its separate financial statements. We derived the value-in-use in the parent company's impairment testing for shares in subsidiaries from the group level impairment tests.
- We involved KPMG valuation specialists when considering the appropriateness of the used assumptions compared to external market and industry data and to assess the technical accuracy of the calculations.
- We evaluated and challenged the key assumptions used in respect of profitability levels, discount rates and long-term growth rates.
- In addition, we assessed the appropriateness of the parent company's disclosures regarding impairment of subsidiary shares.

RESPONSIBILITIES OF THE BOARD OF DIRECTORS AND THE MANAGING DIRECTOR FOR THE FINANCIAL STATEMENTS

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing

Directors are responsible for assessing the parent company's and the group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the group or cease operations, or there is no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may

involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the parent company or the group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the

group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER REPORTING REQUIREMENTS

OTHER INFORMATION

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises information included

in the report of the Board of Directors and in the Annual Report, but does not include the financial statements and our auditor's report thereon. We obtained the report of the Board of Directors prior to the date of this auditor's report, and the Annual Report is expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to the report of the Board of Directors, our responsibility also includes considering whether the report of the

Board of Directors has been prepared in accordance with the applicable laws and regulations.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have performed on the report of the Board of Directors, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

OTHER OPINIONS

We support that the financial statements should be adopted. The proposal by the Board of Directors regarding the use of the profit shown in the balance sheet is in compliance with the Limited Liability Companies Act. We support

that the members of the Board of Directors of the parent company and the President and CEO should be discharged from liability for the financial period audited by us.
